LEE'S SEEDS for 1921

ESTABLISHED 1898

ARTHUR G. LEE
SEEDSMPAN
FORT SMITH
ARKANSAS
Notice to Customers--Read Carefully

A CAREFUL OBSERVANCE of the following suggestions will assist materially in avoiding and eliminating unnecessary misunderstandings and mistakes. Fort Smith, Ark., is splendidly situated for shipping all heavy bulk goods by freight, being so centrally located that rates are very low to a wide range of country.

NAME AND ADDRESS: Frequently orders reach us without name or address, and some of them the post mark blurred. It is impossible for us to trace the senders, therefore please be careful to sign your name, and full address plainly on each and every letter sent us.

HOW TO SEND MONEY: Money can be sent safely by either Post Office Money Order, Express Company’s Money Order or Bank Draft. We accept stamps the same as money. If you remit by cash or stamps you should register your letter.

OUR TERMS: Always enclose remittance with your order. No goods sent C. O. D. unless one-half is remitted with order. We would rather, however, where the prices are known, not to send C. O. D.

WE DELIVER FREE: Packets, ounces, quarter pounds and pounds of Garden Seed and up to and including 2 pounds of Peas, Beans and Sweet Corn. All other prices in this catalogue, excepting where otherwise noted, are based on customers paying all transportation charges. When wanted by mail refer to Parcel Post rate, page 5. Prices are subject to change without notice.

DISCOUNT: We allow a special discount on seeds sold in packets and by the ounce (none other) as follows, postpaid:

Select 30c worth seeds in packets or ounces and send me only .......... $ .25
Select 60c worth seeds in packets or ounces and send me only .......... .50
Select $1.25 worth seeds in packets or ounces and send me only .......... 1.00
Select $2.50 worth seeds in packets or ounces and send me only .......... 2.00

PLEASE ORDER EARLY: Thus enabling us to forward promptly—as a rule the day after the remittance is received. During the Spring rush we may fall a day or two behind; if any greater delay we will advise.

WEIGHTS: In common with most other seedsmen we have for the convenience of our customers as well as ourselves, discontinued the use of the terms bushel, peck, quart, and pint, and now quote all seed listed in our catalogue by weight.

ON GRASSES AND CLOVERS, Miscellaneous Farm Seed and other seeds where 100-pound prices are quoted we supply 25 pounds at 100-pound rate.

ERRORS: We all make them, not intentionally, but they will creep in especially during the busy season. We want you to be sure to WRITE AT ONCE IF, on receipt of your order, you find anything wrong. Give us a chance to make matters right. We want every customer satisfied and are ready and willing to correct all errors.

MARKET GARDENERS, and those using large quantities of seed should send us a list of their requirements. Prices will be furnished promptly and we can frequently make a substantial reduction on large orders. Use Quotation Sheet, page 64.

ARTHUR G. LEE gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds he sends out and will be in no way responsible for the crop. If the purchaser does not accept the seeds on these terms, they are at once to be returned.

In addressing a personal letter to my friends who have been sending me their seed orders for so long, I want to thank you for the business you have favored me with. I have, in a measure I presume, like you, grown up with this country, starting in a modest way to sell seeds in Fort Smith some twenty-two years ago. The country at that time was not so thickly settled as now, and my business was correspondingly small. As the country grew, my business grew and customers multiplied. I have had to occupy larger buildings, the largest being used for my offices, mail order department, and in which my stocks are stored. Modern equipment has been added from time to time as conditions warranted. I have been conservative in running my business, careful not to recommend new varieties of seed until they have been carefully tested and found worth while; and in keeping with the advanced methods used by the better class of seedmen I have maintained for years a thoroughly equipped seed laboratory where all my seeds are carefully tested before they reach you. This is quite an added expense, but I fully appreciate how important it is to know just what my customers receive. You probably have noticed how uniformly true to type, and strong in germinating qualities my seeds have always been, and the reason that I supply thousands of customers with their seed each year is due largely to their confidence in me and my ability to supply the best of seeds at moderate prices.

I am always pleased to receive your letters touching on any matters pertaining to seeds. These letters always receive my personal attention and are answered as fully as possible. I operate two retail stores and shall be pleased to have you call and see me if in our City; if not, remember that I am as near to you as your postoffice, and that I will appreciate any orders that you may send me in the future.

Very sincerely yours,

Arthur G. Lee

Fort Smith, Ark., January 1st, 1921.
IS ARKANSAS FEEDING HERSELF?

Well, we are doing mighty well. Much better than we used to do. The food stuff raised in our state (and this applies to our sister states) last year, as shown by the Government reports amount up into big figures, but listen. In a recent address in Fort Smith Dr. Bradford Knapp, Dean of the Agricultural Department of the University of Arkansas, in the course of his remarks stated “that last year we bought outside of our state five hundred million pounds of mixed feeds, which could have been raised in our own state. We therefore can raise more grain and still not congest the market. You are playing a safe game when you produce that which can be consumed by man or beast.”

Farming Methods Have Been Improved

and crops now raised successfully that heretofore were not thought of. For instance, through Government research and other means it is found that much larger yields of corn can be produced by planting with it some legume crops as Soy Beans, Velvet Beans, Cow Peas, etc. These supply as much nitrogen as the corn takes from the soil at the same time improves your land and furnishes additional feed for stock.

Grasses and Clover are now and can be more successfully raised by obtaining such varieties as are especially adapted to particular soil. This is fully discussed in our grass and clover seed pages.

There are numerous forage crops which can be raised either separately or in connection with other crops, which will produce cheap feed and plenty of it, such as Rape, Vetch, Peanuts, Soy Beans, etc., either separately or with corn and other grains.

The Winter Cover Crop

so important and so neglected. You can cut your feed bill one half, affords stock green forage when they most need it. Your land works while it sleeps and is improved by it, at so small a cost that no land should remain idle. Most prominent among the cover crops are Rye, Barley, Wheat, Oats, Vetch, Rape, etc. These will be fully described in our fall catalogue issued in August.

It is Not the Label Upon the Package

or the name of the vendor, but constant adherence to standards that result in the sale and resale of any line of goods to patrons of an institution. The man who wears a “Knox” or a “Stetson” knows that he is well and modernly dressed in that particular. Why? These producers have established a standard and adhered to it. They have not followed nor adopted every frill and foible that has come into the hat industry in order to gain a temporary advantage. You would buy a “Knox” hat without seeing it because you have confidence in the manufacturer’s well-known standards. Those who know LEE’S SEEDS buy and re-buy because they have confidence that they are getting today the same conservative quality of seeds and service that has been satisfactory in the past.

We will issue during the Spring season current price lists, giving the latest prices on CLOVERS, GRASSES, FIELD and Miscellaneous Seeds. If you do not receive one regularly write us.

PLANT LEE’S SEEDS FOR BEST RESULTS.
PARCEL POST: Under the Parcel Post rate you can have your orders delivered to your door at a very moderate cost.

YOUR POSTMASTER WILL TELL YOU THE PARCEL POST ZONE IN WHICH YOUR POST OFFICE IS LOCATED, MEASURING FROM FORT SMITH, ARKANSAS.

### HOW TO ORDER—Refer to inside of front cover page.
GARDEN SEED DEPARTMENT

ARTICHOKEs

Cultivated for its large, fleshy, flower-heads, which are prepared
and eaten like asparagus. Sow seed in April or May in the open
and transplant the following spring in beds, placing the rows
3 feet apart. The beds should be renewed every four or five years.

One ounce of seed to 100 feet of drill.

LARGE GREEN GLOBE—Best for family use. Pkt., 10c; oz., 75c,
postpaid.

JERUSALEM ARTICHOKE ROOTS—Best food for hogs of its kind
known. Three bushels will plant an acre. Cultivate same as po-
tatoes. 1 lb., 20c, postpaid. By freight or express, pk., $1.00; bu.,
$2.50. Larger lots, write for prices.

ASPARGUS

One ounce will sow about 50 feet of drill.

It may be grown from seed, or propagated by roots. A fair crop
may be expected the third year from the seed, or in one or two
years from the roots, according to their age when planted. Pour
warm water on the seed and allow it to stand until cool. Pour it
off and repeat two or three times with fresh warm water. Sow in
drills about 18 inches apart and 2 inches deep, in rich soil, planting
15 to 20 seeds to each foot of row. When the plants are well up
thin to about 1 inch apart. The plants should be ready to re-set the
next spring and should be set 4 to 6 inches deep, in rows 4 to 6 feet
apart.

COLOSSAL.—Stalks very large, deep green, tender and of good
flavor. Pkt., 5c; oz., 10c; ½ lb., 25c; 1 lb., 75c, postpaid.

PALMETTO—Bears early. Stalks of even, regular growth, very succulent and of superior quality. Pkt., 5c;
oz., 10c; ½ lb., 25c; 1 lb., 75c, postpaid.

ASPARGUS ROOTS

Our strong two-year-old roots will give the best results in the shortest possible time.

The permanent beds should be prepared by deep plow-
ing or spading and thoroughly enriching the ground with
stable manure or other fertilizer; a moist, sandy soil is
best. If the subsoil is not naturally loose and friable, it
should be made so by thoroughly stirring with a subsoil
plow or spade. Set the plants four inches deep and one
to two feet apart in rows four to six feet apart. After
the plants are well started, give frequent and thorough
cultivation. Early the next spring spade in a heavy
dressing of manure and about one quart of salt and
double the quantity of fresh wood ashes to each square
rod and cultivate well as long as the size of plants will
permit, or until they begin to die down. The next season
the bed may be cut over two or three times, but if this is
done, all the shoots, no matter how small, should be cut.

After the final cutting, give a good dressing of manure,
ashes and salt. Cultivate frequently until the plants
meet in the rows.

In autumn after the tops are fully ripe and yellow,
they should be cut and burned. A bed fifteen by fifty
feet, requiring about one hundred plants, if well cul-
tivated and manured, should give the following season an
abundant supply for an ordinary family and continue
productive for eight or ten years.

PALMETTO AND COLOSSAL—Two-year-old roots, per
doz., 20c; 100, $1.50, postpaid; by express, 1,000, $12.00.

Siberian Kale.
(Description and prices, page 8.)
LEE'S DEPENDABLE GARDEN BEET SEED

LEE'S MARKET GARDENER—THE BEST

DEEP RED TURNIP BEET, not only for the market gardeners, but for home use. Its small top, early maturing and the splendid shape and color of the root makes it popular with everyone who plants it. Tops small, upright-growing, so that the rows may be close together. Leaf stem and veins dark red; blade green; root globular and very smooth; color of skin dark blood red; flesh deep vermillion red, zoned with a darker shade, very crisp, tender and sweet. Pkt., 5c; oz., 25c; 1 lb., 45c; lb., $1.25; postpaid; 10 lbs., or over not prepaid, 75c per lb.

EXTRA EARLY EGYPTIAN—This is the best variety for forcing in hot beds or for transplanting, but does not attain a large size. Very early, dark blood red, medium size, tender and sweet. Pkt., 5c; oz., 15c; 1 lb., 55c; lb., $1.00, postpaid; 10 lbs., or over not prepaid, 75c per lb.

CROSBY'S EGYPTIAN—On account of its earliness and being especially desirable for forcing, this beet is very popular with the Market Growers, considered by some the best. In its class, "Almost globe shaped, very smooth, sweet and tender, and of excellent quality. The flesh is bright, vermillion red, zoned with a lighter shade. We offer French grown seed of the very best quality. Pkt., 5c; oz., 15c; lb., $1.00, postpaid; 10 lbs., or over not prepaid, 75c per lb.

ELECTRIC BLOOD TURNIP—Coming in at the same time as the small, flat Egyptian, it is much larger and almost globe-shaped. Fine-grained, extremely tender and of good sweet flavor. Color, rich red, tinged with dark crimson. Pkt., 5c; oz., 15c; 1 lb., 55c; lb., $1.00, postpaid; 10 lbs., or over not prepaid, 75c per lb.

CRIMSON GLOBE—The interior is a rich, deep crimson and fine grained in texture. It is early-ripened, of medium size, and does not become coarse at maturity. Pkt., 5c; oz., 15c; 1 lb., 55c; lb., $1.00, postpaid; 10 lbs., or over not prepaid, 75c per lb.

IMPROVED EARLY BLOOD TURNIP—This is a larger beet than those named above. It is an excellent one for the home garden and summer use. An old-time standby. Pkt., 5c; oz., 15c; 1 lb., 55c; lb., $1.00, postpaid; 10 lbs., or over not prepaid, 75c per lb.

EARLY ECLIPSE—A very early maturing Beet, especially desirable for the home garden. Top of medium size. Root nearly globular, with small, flat root and small collar. Flesh bright red, zoned with white. Very sweet, crisp and tender. Pkt., 5c; oz., 15c; 1 lb., 55c; lb., $1.00, postpaid; 10 lbs., or over not prepaid, 75c per lb.

BORECOLE OR KALE

The Kales are more hardy than cabbage, and are improved by frost, but the time and manner of sowing and the culture are identical with cabbage.

One ounce of seed will make 150 feet of Drill, 3 or 7 pounds to an acre.

SIBERIAN—One of the best-known and most largely used varieties of Kale, it is sometimes called Sprouts or German Greens. The bluish green leaves are very large and comparatively plain in the center, but coarsely cut and distinctly frilled on the edge. The plant is low but spreading and very hardy. Pkt., 5c; oz., 15c; 1 lb., 55c; lb., $1.25, postpaid.

BRUSSELS SPROUTS

This plant grows 2 or 3 feet high and produces from the sides of the stalks numerous little sprouts, 1 or 2 inches in diameter, resembling cabbage. The leaves should be broken down in the fall to give the little cabbages room to grow. They are very tender and sweet after early frost. The small heads are hulled and served in the same manner as cabbage. Sow in seed-bed in May. Pkt., 5c; oz., 15c; 1 lb., $1.00, postpaid.
LEE'S MANGE L WURZEL OR STOCK BEETS

A SPLENDID WINTER FEED FOR CATTLE AND HOGS. INCREASES THE MILK FLOW, YIELD LARGER CROPS THAN TURNIPS, AND ARE HIGHER IN FEEDING VALUE.

Our sale of Mangel and beet sugar Mangels for stock feeding increases each year. An agreeable change of food for any animal kept on dry forage in winter. With dairy cattle the increased flow of milk and generally improved condition of animals show the great value of these crops. Where their value is known almost every farmer plants them. They can be grown very successfully if planted early in the spring and when about 3 inches high begin thinning and continue at intervals until roots stand about ten inches apart.

MANGEL WURZEL, MAMMOTH LONG RED.—The largest of all mangels. The roots grow about one-half out of the ground and frequently measure two or more feet in length by six inches in diameter. An excellent keeper, nutritious and milk-producing. Pkt. 5c; oz. 30c; 1 lb. 75c; 10 lbs. $1.00; postpaid; 10 lbs. $4.00, net postpaid.

WHITE FRENCH SUGAR.—Desirable for stock feeding for reason of its having high nutritive value, being especially rich in sugar. Roots are very large and oval shaped with smooth clear skin. On account of its growing well out of the ground it is easily harvested. Pkt. 5c; oz. 30c; 1 lb. 75c; 10 lbs. $1.00, net postpaid; 10 lbs. $4.00, postpaid.

SUGAR BEETS

VILMORS IMPROVED.—For sugar making. One of the highest sorts in sugar content. Pkt. 5c; oz. 30c; 1 lb. 75c; 10 lbs. $1.00, postpaid. Order before July 1st.

Burckh. No. 452, published by the U. S. Department of Agriculture, Washington, D. C., will give the full information how to make sugar from Sugar Beets. Write for it. 10c free.

WE DELIVER FREE

We pay postage on Packets, Quarters, Half Pounds and Pounds of Garden Seeds and up to and including two pounds of Peas, Beans and Sweet Corn.

BURDOCK. Cooking

It is called Japanese spinach on account of the roots growing like the spinach. The roots attain about two feet long and one inch in diameter. The root is white-colored and crisp, of fine flavor, something like spinach. Valuable for soup or stew and may be used as asparagus when boiled. It contains a value of medical assistance for constipation, swelling, cough, or toothache. Culture on the same as spinach. Pkt. 10c; oz. 25c; 1 lb. 75c, postpaid.

We recommend customers when ordering in small way, to select Garden Seeds in ounces quantities. In this way you receive excellent values and sufficient quantity for successive planting throughout the season.

TRUCK AND MARKET GARDENERS

Wishing to buy Seed in quantity will please mail us a list of your probable wants, so we can quote you special prices.

MIDGET NORCROSS GARDEN CULTIVATOR

An ideal implement for women who prefer a light weight tool. 3-inch handle. 50c, postpaid. Refer to page 97 for prices on larger sizes.

Grown exclusively for the numerous fresh, tender leaves and leaf stalks. The mid rib is cooked and served like asparagus. The leaves the same as spinach. The plants may grow to a height of two feet. Swiss Chard should have a prominent place in all gardens. Valuable for greens for chickens by cutting the stem and the leaves. Pkt. 6c; oz. 25c; 1 lb. 75c, postpaid.
LLE’S GARDEN BEANS

Prices named on Beans include postage up to and including 2 lbs.

Beans are very sensitive to both cold and wet, and it is useless to plant them before the ground has become dry and warm. Up to the time of blossoming they should have frequent shallow cultivation. Any mutilation of the roots by cultivation after the plants come into bloom is likely to cause the blossoms to blast and so cut off the crop. One pound will plant 100 feet of drill; 1 to 2 bushels to the acre.

Dwarf, Green-Podded Sorts

The prices on all varieties of Beans listed on this page are: .Pkt., 15c; lb., 35c; 2 lbs., 65c, postpaid; 10 lbs., $2.50, by Express or Freight, at purchaser’s expense. Write for special prices in quantities of 50 or 100 lbs. lots and over.

BURPEE’S STRINGLESS GREEN POD—Surpasses all other bush Beans in crisp, tender qualities and fine flavor. For the home garden it is considered one of the best in its class. The pods are round, of good size, fleshy, strictly stringless, and continues bearing for a long time. Matures early. Seed brown.

Giant Stringless Green Pod

EXTRA EARLY RED VALENTINE (Round Pod)—A valuable sort for home garden and shipping. Pods are usually ready to pick in about forty-three days from germination. Vine erect; pods medium length, curved, cylindrical, with crease in back; very fleshy; crisp and tender.

TENNESSEE GREEN POD—The pods are very long, often six to seven inches flat, irregular in shape, bright but rather dark green and of exceptional fine flavor. Seed of medium size, oval flat, yellowish brown in color.

LONGYELLOW—A new early variety with perfectly round and uniformly straight pods; very fleshy, very prolific; plants very strong and compact in growth. Adapted to the South and long-distance shipping.

BLACK VALENTINE—A very hardy and productive green podded variety, round or slightly flattened pods. Comes in a few days later than the Red Valentine. Seed medium sized, black, oblong, slightly flattened.

LONG YELLOW SIX WEEKS—A fine early String Bean. Flat pod; light green color.

EXTRA EARLY REFUGEE—Good for very early or late use for table, shipping and splendid for pickling.

REFUGEE, OR THOUSAND TO ONE—Esteemed for late planting and for canning and pickling.

EARLY MOHAWK—Productive; very hardy. Very early. Large, flat, dark green pods.

DWARF HORTICULTURAL or BUSH CRANBERRY—One of the best dwarf sorts for green shell beans for the home garden and market and can be used early as a green podded snap bean. They become fit for use as green shelled beans early and in this condition the beans are very large, easily shelled and are about equal to the Lima in quality.

WAX-PODDED BUSH BEANS

CURRIE’S RUST-PROOF WAX—A very early, beautiful Wax Bean, bearing an abundance of crisp, tender, stringless pods, free from rust. It is of excellent quality and delicious flavor.

IMPROVED GOLDEN WAX—The plants are hardy and bear an abundance of straight, broad, flat pods. Resists rust to a marked degree. Seed white, with brown or black markings near the eye.

PROLIFIC DWARF BLACK WAX—One of the earliest wax-podded varieties. Pods 4 to 8 inches in length, usually curved, quite round, meaty, brittle and stringless, deep golden yellow, of excellent flavor.

WARDWELL’S KIDNEY WAX—Strong, upright bush growth; very productive. Pods straight and flat. A rich, gold yellow, brittle and entirely stringless.
PLANT LIMA BEANS THIS SPRING

In many respects Lima Beans are more desirable than the others for use in the green stage and as dry beans. Can be grown as easily as "Snap" beans. Do not plant till the ground is dry and the weather warm.

Prices named on Beans include postage up to and including 2 lbs. Refer to Parcel Post rates, page 5.

BUSH LIMA BEANS

These varieties are of true Bush or Dwarf form, growing but 18 to 20 inches high, without supports. Plant in rows 2 or 3 feet apart and 1 foot apart in the rows.

HENDERSON'S BUSH LIMA—Valuable on account of extreme earliness. Extremely productive, tender and delicious. The dry beans are small and white.

BURPEE'S DWARF LIMA—Plants make bushes from 18 inches to 2 feet high. Pods are large as those of the Pole Lima and contain three to five beans of the best quality.

The prices on all varieties of beans listed on this page are: ...Pkt., 15c; lb., 35c; 2 lbs., 65c, postpaid; 10 lbs., $2.50, by Express or Freight at purchaser's expense. Write for special prices in quantities of 50 or 100 lb. lots and over.

BEANS—RUNNING OR POLE BEANS

The Pole Beans are not so hardy as the Bush sorts, and should be planted several weeks later. Plant in rows 4 feet apart, the hills 24 to 3 feet in the row.

KENTUCKY WONDER, or OLD HOME-STEAD—We consider this to be the best pole bean. It is early, exceedingly prolific, bearing its pods in large clusters. It will bear for a longer period than any other bean that we know of. The pods are very round, almost stringless and from 6 to 12 inches long. Very pleasing in appearance and splendid for market purposes.

CUT SHORT, or CORN HILL—An old variety, very popular for planting among corn, and it will give a good crop without use of poles; vines medium, pods short, cylindrical and tender; beans nearly oblong, cut off diagonally at the ends, white covered at one end with reddish brown dots.

WHITE CRESERA-BACK—Extremely early, very productive. Pods are borne in clusters from four to six; broad, thick, solidly fleshy and stringless.

DUTCH CASE KNIFE—Vines moderately vigorous, climbing well, but twining more loosely than some and so may be used for a corn-hill bean. Leaves large, crumpled; pods very long, flat, irregular, green, but becoming creamy white as they mature. Seed broad, kidney shaped, flat, clear white and of excellent quality, whether used green or dry.

LAZY WIFE—One of the best of the later green-podded Pole Beans for snaps. The pods, borne in large clusters, are from 5 to 7 inches long, broad, thick, fleshy, and entirely stringless. When young they have a rich, buttery flavor, which is retained until they are nearly ripe. The dry beans are excellent for Winter use. Seed white.

LONDON HORTICULTURAL, or SPECKLED CRANBERRY—Pods short, broad, pale green, streaked with bright red as they mature. Beans are large, ovate, flesh-colored, splashed and spotted with wine-red and of the highest quality, either green or dry. Many like this variety better than the Limas.

Carolina Sieva (The Best Pole Lima Bean)—A climbing form of the Henderson Bush Lima and very popular. This variety is a continuous bearer and furnishes the most tender and delicious beans for the table. It's very prolific and a hardy grower for "butter beans" in the South.

KING OF THE GARDEN—An improved strain of the Large White Lima of more prolific character and with larger pods and beans. Large early crops and bears until frost. Only two plants should be allowed to one hill.

**Kentucky Wonder Pole Bean**

![Kentucky Wonder Pole Bean]

Refer to Page 63 for Prices.
LEE’S DEPENDABLE CABBAGE SEED

Our Cabbage Seed are grown under special contract in localities where they are brought to the highest state of perfection. No better seed can be obtained as is evidenced by some of the largest growers relying on LEE’S SEEDS year after year.

Good drainage, plenty of manure on rich, heavy loam, and frequent cultivation are essential to success in Cabbage-growing. For the early sorts sow the seeds in the Fall and when the plants are a month old, transplant to cold-frames, setting them down to the first leaves. Sow also in January and February and transplant 2 to 3 feet apart in the rows, according to variety planted. For late variety, sow from the middle to the last of Spring and transplant when 4 to 6 inches high.

One ounce will produce 1,500 plants; one-half pound will suffice for one acre.

THE FOUR BEST EARLY VARIETIES

LEE’S MARKET GARDENER

THE EARLIEST LARGE, ROUND-HEADED CABBAGE YET PRODUCED—Has been thoroughly tested by our best Cabbage growers, with great success. This is a most excellent sort, both for the home-garden and market gardening, very heavy and solid Cabbage: makes a fine large, globe-shaped head with well developed outside leaves, but is very early in maturing, coming in with the Early Jersey Wakefield. It is short-stemmed, the heads being produced almost on the ground. The heads mature all at the same time. Pkt., 10c; oz., 25c; lb., $1.00; lb., $3.75, postpaid.

COPENHAGEN MARKET—A comparatively new variety which has gained great popularity, especially among the Market Growers and shippers, as it combines the two desirable qualities of being early and large, maturing with the Wakefield varieties and producing fine large ball-shaped heads. With the exception of Lee’s Market Gardener this is probably the most desirable of the early varieties. An equally desirable variety for the home garden. We offer a very selected strain of this seed. Pkt., 10c; oz., 25c; lb., $1.00; lb., $3.75, postpaid.

EARLY JERSEY WAKEFIELD—The most desirable of the early “pointed or conical” headed varieties and more generally planted by the Market Gardeners than any other of its class. Its chief merits are large heads on an early bed, small outside foliage and uniformity of crop. Grown extensively for shipping. Pkt., 5c; oz., 25c; lb., $1.25; lb., $2.50, postpaid.

CHARLESTON, OR LARGE WAKEFIELD—Ripens a few days later than the preceding, but much larger. Of true “Wakefield” type, it possesses all the good characteristics of the Jersey Wakefield in an intensified degree. Maturing as it does but a few days later than the “Early Jersey Wakefield” and producing much larger heads, it is to a considerable degree superseding that variety of more extreme earliness in that especially desired this is a very popular sort. Pkt., 5c; oz., 25c; lb., $1.00; lb., $2.50, postpaid.

ALL HEAD EARLY—This excellent second early variety is very sure heading and of excellent quality. Recommended for spring or fall planting, stems short, heads solid and flat. This variety is well adapted for kraut. Pkt., 5c; oz., 25c; lb., 80c; lb., $2.50, postpaid.

USE SLUG SHOT OR BUG BEET

Non-poisonous insecticides. Sure death to cabbage worm. More largely used for this purpose than anything else. Refer to page 60 for prices.

HOW TO ORDER—Refer to inside of front cover page.
CABBAGE---Late or Winter

PREMIUM LARGE LATE DRUMHEAD—Head enormous. Very hardy and desirable fall and winter variety; also a good shipper. Pkt., 5c; oz., 25c; ½ lb., 80c; lb., $2.50, postpaid.

PREMIUM LATE FLAT DUTCH—The heads are uniformly large, often very large, flat but deep, distinctly flattened on the top, solid and of excellent quality. This is considered by many as the standard, very large late cabbage for home garden and market. It is an excellent keeper. Pkt., 5c; oz., 25c; ½ lb., 80c; lb., $2.50, postpaid.

SURFHEAD—A compact growing, general crop sort, having large, thick heads and many outer leaves. Pkt., 5c; oz., 25c; ½ lb., 80c; lb., $2.50, postpaid.

VOLGA—The heads are about equal size and shape, weighing from 12 to 15 pounds each, round as a ball; the flesh is exceedingly firm, tender and white. This type will mature its heads fully two weeks earlier than any of our late-growing kinds. Pkt., 5c; oz., 25c; ½ lb., 80c; lb., $2.50, postpaid.

CELEBRITY OR CHINESE CABBAGE

Sow in 3-foot rows, thinning the plants 15 to 20 inches apart in the row.

An annual introduced into this country from China. It is a species of cabbage. It also resembles a stalk of celery more than a cabbage head.

It produces beautiful celery-like heads which Blanch easily. It is of mild flavor and can be eaten raw. When used as a salad, it is equal to the finest lettuce. Boiled or cooked like spinach or cabbage it makes excellent greens. It is easily grown and does well in nearly all parts of the country. Pkt., 5c; oz., 25c; ½ lb., 80c; lb., $2.50, postpaid.

Our Frost-Proof Cabbage Plants

By Parcel Post Prepaid

WILL MATURE HEADS TWO TO THREE WEEKS EARLIER THAN YOUR HOME-GROWN PLANTS AND DOUBLE YOUR PROFITS. WHY?

There has been a constant growing demand for field grown Cabbage Plants, grown in some of the Southern States, known as Frost-Proof. These plants are practically Frost-Proof and will usually stand a temperature of 20 degrees below zero without injury. These plants often enable the gardener to put full grown heads of Cabbage on the market two or three weeks ahead, and naturally he gets the early season top prices for his crop.

To get the advantage of these Frost-Proof Cabbage plants they must be planted a month or six weeks earlier than you would plant home-grown plants. We fill orders from December 1st to May 1st.

The plants when received will be somewhat wilted and have a hard stunted appearance, which will be disappointing to persons who have never used these plants before. Regardless of appearance, they will produce the crop results.

Varieties: EARLY JERSEY WAKEFIELD, CHARLES-TON LARGE TYPE WAKEFIELD, SUCCES-SION, and EARLY FLAT DUTCH

Prices by Parcel post, postage paid. In lots of 100, 200, 300, or 400 plants at 50c per 100 plants; 500 plants for $1.75; 1000 or more at $2.25 per 1000 plants.

Orders are filled by the 100, not 250 or 300. These prices are for even quantities of one variety to package; if you ordered 200 of one variety and 300 of another you would pay at the 100 rate.

Prices by Express, buyer paying express charges. In lots of 1000 to 4000 plants at $2.25 per 1000; 5000 or more at $2.00 per 1000. Plants packed for Express shipment, 1000 or 2000 plants of a variety to package, they weigh about 25 pounds per thousand plants, packed for shipment. For the past two years the Express service has been congested, and the deliveries slow and unsatisfactory. We therefore advise Parcel Post shipments.

Order Early to Get Plants Delivered in Time

When we receive your order for these plants, we have to forward it to our growing station which takes several days. Plants are shipped direct to you from growing station. Plants cannot be pulled or shipped when beds are wet. We sometimes have a week or ten days of continued wet weather which prevents shipment. If you do not receive your plants as soon as you expect them, you will know that weather prevents shipment. Send your order two or three weeks before you expect to set the plants and you will get them on time.

We can furnish very choice Cabbage, Tomato, Egg Plant and Pepper Plants, grown from our own selected seed stock. The plants are grown in cold frames and hardened off. Refer to page 25 for prices.
LEE'S CARROT SEED

For table use, sow the smaller kinds early, in rows 16 to 18 inches apart. For field culture, sow in drills 18 to 24 inches apart, using from 15 to 3 pounds of seed to the acre. Cover 1 to 1 inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. Thin 4 to 6 inches apart in the row. One ounce sows 100 feet of drill.

EARLY SCARLET SHORT HORN—Quite short, nearly round. Adapted for forcing for market and for home use. Stocky, firm, yellow, thick and fleshy. It is very free from straws and makes a round, compact head. Pkt., 5c; oz., 55c; 1 lb., $1.00; 15 lb., $15.00, postpaid.

DANVER'S HALF-LONG—A rich orange red variety, very smooth and handsome. An excellent market variety. Tops are of medium size and coarsely divided. The roots taper to a blunt point; flesh sweet, crisp and tender. Although the roots of this variety grow shorter, it produces more bulk to the acre than the larger field varieties. Pkt., 5c; oz., 15c; 1 lb., 35c; lb., 95c, postpaid.

CHANTENAY—Deep red flesh, fine grained and sugary. One of the best for home or market garden. It is early, grows about six inches long; stump rooted, always smooth. Pkt., 5c; oz., 15c; 1 lb., 35c; lb., 95c, postpaid.

OX HEART OR GUERNAND—This variety is one of the most valuable, either for family use or market. It is intermediate between the half-long and horn varieties, attaining a diameter of 3 to 4 inches at the neck; good shape and rich orange color. The flesh is fine grained, with little core. Pkt., 5c; oz., 15c; 1 lb., 35c; lb., 95c, postpaid.

IMPROVED LONG ORANGE—A well known standard sort; roots long, thickest near the crown, tapering regularly to a point, color deep orange, suitable for the table and main field crop. Pkt., 5c; oz., 15c; 1 lb., 35c; lb., 95c, postpaid.

CHERVIL

Used for flavoring and garnishing dishes of meats and vegetables. The leaves are ready for use in six to ten weeks from sowing the seed. Sow in early spring in rich, well-prepared soil, and when the plants are well established transplant to about 1 foot apart. Pkt., 5c; oz., 25c, postpaid.

CELERIAC

TURNIP-ROOTED LARGE SMOOTH PRAGUE—This is an improved form of the Turnip-rooted Celeri. Roots large, round and smooth, and free from side roots; a profitable variety for market gardeners. Sow seed same as celery, transplant into rows 2 feet apart and about 6 to 8 inches in the row. No earthing up is required for Celeriac, as it is the roots which are the edible portion of the vegetable. For winter use, pack in damp sand or earth in cellar, or cover with straw and earth outside. Pkt., 5c; oz., 25c, postpaid.

CAULIFLOWER

Cauliflower succeeds well in any soil where Cabbages will grow. It delights in a rich soil and plenty of water. For early sorts, sow in a hot-bed in December or January; for later crop, sow in March in a moist place. Transplanting should be done in moist weather.

One ounce of seed for 3,000 plants.

EARLY SNOWBALL—Its dwarf habit and short outer leaves allow it to be planted very close—18 to 20 inches apart. It is well adapted for forcing under glass throughout the winter and spring. It gives a pure snow-white, medium-sized head. Pkt., 10c; 1 oz., 40c; oz., $1.25, postpaid.

COLLARDS

The Collard is a peculiarly Southern vegetable, cultivated extensively throughout the South for cabbage greens. It grows 2 to 3 feet high; does not head.

GEORGIA, SOUTHERN OR CREOLE—Forms a large, loose, open head, or a mass of leaves on a tall stem. Freezing does not injure, but rather improves the quality. Sow thick in drills, in rich ground, transplanting when 4 inches high; or sow in drills where the plants are to remain, and when well started thin to 2 or 3 feet apart in the row. In the South sow from January to May and from August to October. Pkt., 5c; oz., 15c; 1 lb., 35c; lb., $1.00, postpaid.

WHITE PLUM—By simply tying up the stalks and drawing up the soil with the hoe, the work of blanching is complete. It is tender, crisp and of good flavor. Pkt., 5c; oz., 25c; 1 lb., 55c; lb., $2.25, postpaid.

GOLDEN SELF-BLANCHING—This Celeriac may be regarded as one of the best varieties for our climate and soil. Of a golden yellow color; the ribs are brittle and of a delicious flavor. It blanches much easier than any other, and the stalks seldom become hollow. Pkt., 10c; oz., 60c; 1 lb., $2.00; lb., $7.00, postpaid.

HOW TO ORDER—Refer to inside of front cover page.
LEE’S SWEET OR SUGAR CORN

The Sweet or Sugar Corn varieties, being liable to rot in cold or wet ground, should not be planted until May, or when the soil has become warm and dry. For a full supply for the table during the entire season, plant every ten days or two weeks until the last week in July, in hills 2x3 feet apart for the early kinds, and 3x3 feet for the large late sorts. One-quarter pound of seed corn plants 100 hills; 12 lbs. will plant an acre.

WRITE FOR SPECIAL PRICES IN QUANTITIES OF 50 OR 100 LB. LOTS AND OVER.

GOLDEN BANTAM—We place this at the head of our list as we consider it the ideal Corn for the home garden. While it is a comparatively new Corn it has won for itself the highest mention. For sweetness and richness of flavor it is equal to or surpasses the Country Gentleman. Can be planted earlier than any other Sugar Corn, is hardy, early maturing, of very dwarf growth and can therefore be planted closer than other sorts and through a longer range of season. The cob is small, but fills out nicely with large, deep, cream-colored kernels, which turn to yellow when entirely ripe. Lb., 35c; 2 lbs., 65c, postpaid. Not postpaid, 10 lbs., $2.50.

STOWELL’S EVERGREEN—The most popular late Sweet Corn. More extensively planted than any other sort, being the general favorite with market gardeners and canners for late use. If planted at the same time with earliest kinds, it will keep the table supplied until October. Ears are of good size, grain deep, tender, and sugary, remaining a long time in condition for cooking. Lb., 30c; 2 lbs., 55c, postpaid. Not postpaid, 10 lbs., $2.50.

COUNTRY GENTLEMAN—One of the best known of the mid-season varieties. It is the old shoepeg type of kernel, pure white, very sweet and tender. It is a good gatherer and remains ready for use longer than any other sort. Considered by many to be the best Sweet Corn. Lb., 35c; 2 lbs., 65c, postpaid. Not postpaid, 10 lbs., $2.50.

BLACK MEXICAN—Extremely sweet. For family use it has no equal; is very hardy and yields as much as any other variety; grains black, or bluish black, but does not color the water in boiling. Lb., 30c; 2 lbs., 55c, postpaid. Not postpaid, 10 lbs., $2.00.

EARLY MINNESOTA—This old and deservedly popular variety is one of the best early sorts for the market and the private garden. Stalks about 6 feet high and bearing one or two large or medium-sized ears, which are well filled with fine white grain that is of excellent quality if pulled at the proper stage. Lb., 25c; 2 lbs., 45c, postpaid. Not postpaid, 10 lbs., $1.50.

POPCORN, WHITE RICE—Ears short; kernels long, pointed and resembles rice; color white. (Shelled). Lb., 20c; 2 lbs., 35c, postpaid; 10 lbs., $1.50, not postpaid.

POPCORN, QUEEN’S GOLDEN—The grains are large, and are exceedingly tender. (Shelled). Lb., 20c; 2 lbs., 35c, postpaid; 10 lbs., $1.50, not postpaid.

EARLY ADAMS (Not a Sweet Corn)—This is a very hardy sort and can therefore be planted very early. The stout stalks grow 6 to 7 feet in height, bearing one or two large or medium-sized ears, which are well filled with fine white grain that is of excellent quality if pulled at the proper stage. Lb., 25c; 2 lbs., 45c, postpaid. Not postpaid, 10 lbs., $1.50.

POPCORN, WHITE RICE—Ears short; kernels long, pointed and resembles rice; color white. (Shelled). Lb., 20c; 2 lbs., 35c, postpaid; 10 lbs., $1.50, not postpaid.

POPCORN, QUEEN’S GOLDEN—The grains are large, and are exceedingly tender. (Shelled). Lb., 20c; 2 lbs., 35c, postpaid; 10 lbs., $1.50, not postpaid.
LEE'S DEPENDABLE CUCUMBER SEED

Plant as soon as the weather has become settled and warm, in hills 4 feet apart each way. Cucumbers succeed best in warm, moist, rich, loamy soil. Plant the seeds about ½ inch deep. One ounce of seed will plant about 50 hills; two pounds, will plant an acre.

IMPROVED TONG GREEN—We have a greatly improved strain that grows 10 to 12 inches long and makes the best of sweet pickles when young; the full sized fruits are best for slicing. Dark green, handsome, uniformly shaped, crisp, quality excellent. The vines are vigorous and produce fruits in great abundance. Pkt., 5c; oz., 15c; ½ lb., 50c; lb., $1.25, postpaid.

KLONDIKE WHITE SPINE—A medium early, white spined cucumber of handsome, very dark, green color and of excellent quality for slicing. The vines are very hardy and productive. The mature fruits, when grown under favorable conditions, are often about eight inches in length, and are uniform in size and shape. The color is very dark green, slightly striped at the ends. Its uniform size and shape and splendid color are making this variety very popular as a shipping sort. Pkt., 5c; oz., 15c; ½ lb., 50c; lb., $1.25, postpaid.

DAVIS PERFECT—A splendid cucumber for the home garden and for the truck garden. Produces all the merits of the best slicing varieties; uniformly uniform, and very productive. Their handsome, shiny and dark green color commands the highest price on the market. Pkt., 5c; oz., 15c; ½ lb., 50c; lb., $1.25, postpaid.

EVERBEARING—This is a very early variety and extremely prolific. If the fruits are kept gathered, vines will continue in bearing throughout the season. The fruits of rich dark green color, gain from the grape to the very large in diameter. Owing to its great productivity, it is an excellent variety to plant for producing small pickles. Pkt., 5c; oz., 15c; ½ lb., 50c; lb., $1.25 (postpaid).

EARLY CLUSTER—Regularly producing the bulk of the crop near the root ends. Sow Short with uniformly thick end, dark green, fat ears at blossom end. A very productive sort. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.25, postpaid.

GREEN PROLIFIC—An excellent producer, planted both for slicing and pickling; 4 or 5 inches long when large enough to use. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.25, postpaid.

EARLY SHORT GREEN—This variety is known as Early Frame and is an excellent sort, both for table use and for pickling. Forms a compact bush, rich, dark green. Far superior to the Early Cluster. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.25, postpaid.

JAPANESE CLIMBING—Can be trained upon a trellis or poles. It endures summer heat and drought exceedingly well. The cucumbers are from 11 to 13 inches in length, skin smooth, dark green. The flesh is pure white, crisp, and of mild flavor. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $2.00, postpaid.

CORN SALAD

One ounce will sow 20 square feet.

Sown with the approach of cool weather in the fall, it will produce an abundance of leaves which may be used as a salad throughout winter and spring. Quite hardy, but should be protected during severe weather.

LARGE-SEEDED—Pkt., 5c; oz., 20c; ¼ lb., 60c; lb., $2.00, postpaid.

CREASE

FINE CURLY—(Pepper Grass.) A well-known pungent salad, can be used alone or with lettuce. Quartz to be sown thickly (covering very lightly) at frequent intervals, to keep up a succession, as it soon needs to be cut. Quick growing; leaves finely cut like parsley; growth dwarf and compact; crisp and pungent. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.25, postpaid.

ENDIVE

Endive may be grown at any season of the year, but is more generally used late in the fall. Sow the seed in June or July in drills 11 to 20 inches apart and when well started, thin the plants to 1 foot apart. When nearly full-grown, tie the outer leaves together over the center, in order to Blanch the heart of the plant. By covering fresh plants every few days a succession may be kept up.

BROAD-LEAVED BATAVIAN—(Escarole.) This variety has broad, thick, plain or slightly wrinkled leaves, forming a large head, and is desirable for stews and soups. If the outer leaves are gathered and tied at the top, the inner ones will blanch and may be used for salad. Pkt., 5c; oz., 15c; ¼ lb., 50c, postpaid.

GREEN CURLY—(Lettuce.) Leaves finely cut. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.25, postpaid.

HOW TO ORDER—Refer to inside of front cover page.
LEE'S DEPENDABLE LETTUCE SEED

Sow in rich, moist ground early in the spring, as soon as the ground can be put in good shape. Sow in rows 2 feet apart and thin out the plants until they stand 1 foot apart in the row. As the quality of lettuce depends largely upon quick growth, frequent cultivation should be given to encourage it. Make successive sowings until July and again at the end of August for fall supply. One ounce will sow 150 feet of drill.

NEW YORK—We offer for the first time this splendid new lettuce which has gained a nation wide reputation, and recommend it as being of unusual merit. Noted for its size heads, frequently growing 2 to 3 lbs., for its compact and tight heading qualities and for its ability to stand long distance shipping. Its quality is very sweet and tender. Recommended as the best shipping lettuce and very desirable for the home garden. Pkt., 10c; oz., 25c; lb., 75c; 1lb., $1.25, postpaid.

MAY KING—Of quick growth and produces large, handsome heads with few outside leaves. Color light green, outer leaves folding closely, producing round, solid heads 4 to 7 inches in diameter. Splied for market gardeners or private use. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

BIG BOSTON—(White Seeded). Grown largely in the South as a winter lettuce. When grown in cold-frames or hot-houses it forms large, solid heads, with broad, comparatively smooth and thin leaves. They are of light green color, and quite tender when well grown. Outside it is a loss distinctive heading sort, the plants being vigorous, growing to a good size and forming loose heads. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

PRIZE KING—Plant large, deep green, so washed with red as often to appear more red than green, forming a head of a dense mass of leaves rather than one solid, tight and a Cabbage. Exceedingly crisp, tender and good flavored. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

DEACON—Of finest quality, with thick, crisp leaves. The outside leaves are bright green, while the inner portion of the head is of a beautiful creamy yellow color. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

CALIFORNIA CREAM BUTTER—Forms round, crisp, solid heads, of buttery flavor, medium early. One of the best summer varieties of Head Lettuce. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

CURLED OR LOOSE LEAVED VARIETIES

PARIS WHITE COS—Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

LEES MARKET GARDENER FORCING—An excellent variety for growing under glass, where it stands higher temperature than Grand Rapids and can be crowded to maturity. Also well adapted for outdoor growing. The plant is more compact than the Grand Rapids. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

GRAND RAPIDS LETTUCE—This superb Lettuce is especially adapted for green-house culture; also a good Lettuce to sow outside early in the spring for family use. Makes large, compact bunches of light, attractively curled and fringed leaves. It grows very rapidly and keeps in good marketable condition for a long time after cutting. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

BLACK-SEEDED SIMPSON—One of the best, either for forcing under glass or for open ground culture. It forms large, thin, loose leaves of light green color, very tender, crisp and of fine quality. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

EARLY CURLY SIMPSON—A leading early sort; forms a compact mass of curly leaves of yellowish green. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

New York—A Heading Lettuce of Great Merit

IMPROVED HANSON—One of the best for growing during the hot summer months, as it will stand heat and dry weather to perfection. The large, solid heads weigh sometimes 2 or 3 pounds. They are of light green color outside, and white within, tender, crisp and of fine flavor. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

IMPROVED ICEBERG—Large, handsome head, fine flavor. The light green, curly outside leaves have slightly reddish edges; inside leaves are strongly arch-ed, making a solid, well-balanced, head. Very hard-headed and deliciously crisp. One of the very best of the newer sorts. Pkt., 5c; oz., 15c; 1 lb., 40c; lb., $1.25, postpaid.

HOW TO ORDER—Refer to inside of front cover page.
LEE'S DEPENDABLE EGG PLANT SEED

One ounce produces 1,500 plants; 4 ounces to the acre. Ready for the table in 120 days from sowing.

CULTURE—In February or March sow in hot-beds and keep warm. When 2 inches high, transplant to pot or to good rich soil. About the middle of May set out 3 feet apart each way and protect from bugs by dusting lightly with Slug Shot.

BLACK BEAUTY—Ten days or two weeks earlier than the preceding, with fruits just as large, of uniform shape and rich, lustrous black color. Fruits develop very quickly and planters will be pleased with them. Pkt., 10c; oz., 40c; ¼ lb., $1.50, postpaid.

NEW YORK IMPROVED SPINELESS—This is an entirely spineless strain of the large purple-fruiting, which is the well-known standard. The plants are equally as productive, fruits are large and well colored, but stems and calyx are entirely free from spines. Pkt. 10c; oz., 40c; ¼ lb., $1.50, postpaid.

TRANSPLANTED EGG PLANTS—These plants are grown from seed supplied by us, thus insuring genuineness of all the plants we offer. 40c per doz., postpaid.

HORSE RADISH

Grown from pieces of the roots. Mark off the rows 2½ feet apart in rich, moist, well-prepared ground, and set the pieces of roots 18 inches apart in the rows vertically, the small end down and the top 1 to 3 inches below the surface. Cultivate thoroughly until the tops cover the ground, when their shade will keep down the weeds. Per doz., 30c; per 100, $2.00, postpaid.

KOHL RABI

(TURNIP-ROOTED CABBAGE)

One ounce of seed will drill 200 feet.

EARLY WHITE VIENNA—Extremely early, with distinctly small tops. Bulbs of medium size, white, handsome and of best quality. Pkt., 5c; oz., 30c; ¼ lb., $1.00, postpaid.

EARLY PURPLE VIENNA—Very early, with small top, the leaf stems being tinged with purple. Bulbs bright purple, flesh white. Pkt., 5c; oz., 30c; ¼ lb., $1.00, postpaid.

LEEK

The Leek belongs to the Onion family. Sow the seed and care for the young plants as for Onions, but they need more room in order to develop. When the young plant is about the size of a goose quill, transplant to a prepared bed in rows 2 or 2½ feet apart and 4 or 5 inches in the row. Set the roots deep and draw the earth to them when cultivating, so that they may be well blanched by the time they are fit for use.

LARGE AMERICAN FLAG—A variety which has become very popular with some market gardeners on account of its being larger than the London Flag. Pkt., 5c; oz., 15c; ¼ lb., 90c, postpaid.

MARKORAM—(Sweet American). Home-grown seed is the best for winter use, as it makes more bulk. Pkt., 5c; oz., 65c.

LAVENDER—(Aromatic). Pkt., 5c; oz., 35c.

ROSEMARY—Pkt., 5c.

RUE—Pkt., 5c; oz., 50c.

SAGE—Tender leaves and tops are used in sausage stuffing and sauces. Pkt., 5c; oz., 35c.

SAVORY—(Summer). For seasoning. Pkt., 5c; oz., 35c.

THYME—(Summer). For seasoning. Pkt., 5c; oz., 75c.

GARLIC—See page 26.

MUSTARD

One ounce sows 30 feet, 4 or 5 pounds per acre.

JAPANESE SMOOTH LEAVED—(New). The plant sends up a stout stalk 3 to 4 feet high, producing a mass of large fleshy, smooth leaves which can be pulled off the stem the same as you can Kale. Makes excellent greens of sharp pungent flavor; very hardy. Pkt., 5c; oz., 15c; ¼ lb., 55c; lb., $1.00, postpaid.

SOUTHERN GIANT CURLLED—Leaves light green, frilled and much crimped at edge. Highly esteemed in the South for its vigorous growth and good quality. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 85c, postpaid.

CHINESE—A comparatively new, but excellent mustard; a very hardy, broad leaved variety, deeply savoyed with broad white mid-rib. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 65c, postpaid.

LARGE SMOOTH LEAVED—Large plain or comparatively smooth leaves. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 65c, postpaid.

WHITE ENGLISH—Leaves comparatively smooth and deeply cut. The plant is upright in growth, inclined to branch as it approaches early maturity and soon bolts to seed. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 65c, postpaid.

Southern Giant Curled Mustard.
LEE'S CANTALOUPES OR MUSK MELONS

Plant in hills 6 feet apart each way, putting six to ten seeds in the hill, and when danger from insects is past, leave three or four of the strongest plants only. They may also be sown in rows at distances made about 5 feet apart, and when the plants are well up, thinned to stand in hills 5 to 6 feet apart just before the plants begin to run.

One ounce of seed will plant 60 hills; 2 or 3 pounds will sow an acre.

Market Growers:

We are the largest dealers in Cantaloupe Seed in the Southwest. Our seed is grown under special contract and seed saved only from the very best types of Melons. We have supplied for years the largest growers in this section. You can safely plant our dependable stock.

ROCKY FORD OR NETTED GEM—The most popular small or crate Melon. Famous for its sweet, luscious melting flesh. The seed cavity is small, flesh green; average weight about ½ lb. Just the right size to serve in halves. Fort Smith is in the heart of a large cantaloupe growing section and immense quantities are grown from LEE’S SEED each season and shipped to Northern and Eastern markets. We offer carefully selected seed grown at Rocky Ford. Write for special prices if large quantities are wanted. Pkt., 5c; oz., 10c; ¼ lb., 35c; lb., 90c; 5 lbs., $1.00, postpaid.

SALMON TINT ROCKY FORD—This variety originated by crossing the green fleshed Rocky Ford with a yellow fleshed variety, thus producing a large per cent of the fruit with a mixture of green and orange tinted flesh. Being a hybrid thus produced, the tendency is to breed back to the green fleshed variety. Very popular in some sections. Pkt., 5c; oz., 10c; ¼ lb., 35c; lb., 90c; 5 lbs., $1.00, postpaid.

RUST RESISTANT ROCKY FORD—We consider this type the highest development, both as to netting and rust resistant qualities, yet attained in the Rocky Ford Cantaloupe. The melons run uniform standard size, the exceptionally heavy netting being laced over the entire surface of the melon, making it an ideal shipper. It is green fleshed, shading to salmon about the seed cavity, which is unusually small. Pkt., 5c; oz., 10c; ¼ lb., 35c; lb., 90c; 5 lbs., $1.00, postpaid.

SALMON FLESHED ROCKY FORD

Offered by some as the NETTED ROCK KING or SALMON FLESH EDEN GEM. This strain represents the highest possible attainment in cantaloupe development. It produces melons of the uniform standard size, and are completely covered with a beautiful gray lace-like netting. The seed cavity is very small. Salmon flesh. Has a sweet, luscious, melting, and superb flavor. Pkt., 5c; oz., 10c; ¼ lb., 35c; lb., 90c; 5 lbs., $1.00, postpaid.

SPECIAL OFFER:

At the prices named, in quantities of 5 pounds or over, we will deliver any of the above varieties of Cantaloupe Seed charges prepaid.
LEE'S SOUTHERN GROWN WATER MELON SEED

One ounce of seed will plant 20 or 30 hills; 2 pounds sufficient for an acre.

NOTE:
Do not confuse our splendid Southern grown Melon seed with those grown in the North and West. There is no comparison between them. Southern-grown seeds produce the sweetest and best Melons. The seed we offer are grown under special contract for us and are the Lee's quality—Dependable Seeds.

We supply annually over 10,000 customers with Lee's Dependable Seeds. Our success is due to our ability to distribute good seeds.

Watson Water Melon

WATSON—Of recent years the most popular of the shipping Melons and with the exception of the Irish Gray still retains the lead. Equally desirable in the home markets. Long, green variety, with small white veins running over the rind. The rind is thick, consequently is a good shipper for long distances. The meat is very red and of excellent quality. The fruits are similar in shape and color and have the splendid quality of the Kleckley's Sweet, or Monte Cristo, but averaging larger in size and with a tough rind, making the variety especially adapted for shipping. Pkt., 5c; oz., 10c; 1 lb., 25c; lb., $1.00, postpaid.

IRISH GRAY—We offer this new splendid Water Melon for the first time. You no doubt have heard of it. In sweetness it is like Kleckley's Sweet; in shipping quality, uniformity in shape, size and productiveness it is even better than Tom Watson. The thin rind is so tough it will not burst from rough treatment in transit; its keeping quality will appeal to shippers who have experienced losses on account of glutted markets. The color is a distinct mottled greenish grey; the flesh is red, sweet, crisp and free from stringiness. An unusual melon, for although a good shipper, it is equally fine for the home garden. Pkt., 5c; oz., 10c; 1 lb., 25c; lb., $1.00, postpaid.

HALBERT'S HONEY—One of the newer varieties of splendid quality and especially desirable for home use or nearby markets. They are much like the Kleckley's Sweet, but longer in shape; have a dark green thin rind; exceedingly bright scarlet meat, so crisp and tender that a well ripe melon splits ahead of the knife when cutting. Melons are long, blunt at both ends, very productive. Pkt., 5c; oz., 10c; 1 lb., 25c; lb., $1.00, postpaid.

Kleckley's Sweet, or Monte Cristo—Considered the finest of all medium early Water Melons for home use. The rind is too thin and tender to stand long-distance shipping like the Watson, Halbert's Honey and some of the newer varieties, but for quality it cannot be surpassed. The fruits are uniform in size, oblong in form; the skin is a dark green, the flesh bright scarlet. The seeds lie close to the rind, leaving a very large, solid, red core. The flesh is sugary and melting, being free from stringiness. Pkt., 5c; oz., 10c; 1 lb., 25c; lb., $1.00, postpaid.

SPECIAL OFFER

We list on this page four of the best all purpose Water Melons grown today. For $1.10 we will mail you postpaid 1 lb. each of Tom Watson, Irish Gray, Kleckley's Sweet and Halbert's Honey, or for $3.50 we will mail you postpaid 1 lb. each (4 lbs. in all, sufficient quantity to plant 2 acres) of the above melons.
LEE’S SOUTHERN GROWN WATER MELON SEED

To safeguard your interests and in keeping with the advanced method of handling seed, we maintain a thoroughly equipped seed laboratory for the proper testing of all seeds which we send out.

BRADFORD—The vines are strong and healthy, producing a large number of attractively shaped melons. The color is dark green with darker stripes. The flesh is of fine flavor and contains no stringy substance. Although the rind is thin, it is a desirable shipping Melon. Largely grown in the South, and popular with market gardeners. The seeds are small, white, and are flecked with a brown spot. Pkt., 5c; oz., 10c; ¼ lb., 35c; lb., $1.00, postpaid.

ALABAMA SWEET—One of the best Melons for shipping. Oblong, very large, dark green, faintly striped, very sweet, stringless, very prolific. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., $1.00, postpaid.

FLORIDA FAVORITE—This splendid Melon, while not one of the newer varieties, is yet considered by many to be one of the best Melons for home use and good for shipping. The Melons grow to a very large size; fruit long, dark green, mottled and striped with light shades; rind thin, but firm; flesh very bright deep red, of delicious flavor and tender; seed white. We recommend this to be one of the best Melons on our list. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 85c, postpaid.

GEORGIA RATTLENAKE—One of the oldest and most popular sorts. Fruits very long, of light green color, distinctly striped and blotched with a darker shade. Flesh bright scarlet, very sweet and tender. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 85c, postpaid.

EARLY VARIETIES

HARRIS’S EARLIEST WATER MELON—Sweetest, largest early Melon. Melon is oval to oblong, beautifully striped with green and gray; bright red flesh, which is sweet, tender and delicious. It is the Melon for everybody to grow who wants to be first in the market with fine large Melons. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 85c, postpaid.

To safeguard your interests and in keeping with the advanced method of handling seed, we maintain a thoroughly equipped seed laboratory for the proper testing of all seeds which we send out.

CITRON—Medium size, uniformly round; used only for preserves or pickles. Color dark green. Flesh white and solid but not at all suitable for eating raw. Fruits mature late in the fall, and in this condition can be kept a long time. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 85c, postpaid.

SPECIAL OFFER

In quantities of 5 pounds or over deduct 10c per pound from Water Melon prices. We pay postage.
LEE'S SUPERIOR ONION SEED

Sow in March or April out doors. For large Onions, at the rate of 5 to 6 pounds per acre. For Sets, 40 to 60 pounds per acre. For Pickle Onions, 1 ounce sows 150 feet, 15 pounds per acre.

Bear in mind that to obtain the best results, Onions must be grown on well enriched soil; this is essential for paying results. As early as the ground can be worked in the spring, sow the seed, in drills 14 inches apart, covering half an inch. When the plants can just be seen in the rows, commence hoeing, just skimming the surface. Subsequently weed thoroughly and carefully by hand.

LEE'S GIANT PRIZETAKER—Very large, mild Onion. No other Onion is being so successfully grown in this section. Of Spanish origin, its keeping qualities are perhaps its greatest recommendation, as Onions of this variety usually keep in good condition up to mid-winter or early spring. Succeeds equally well on hill or bottom lands.

By sowing early and transplanting they can be grown to an extraordinary large size the first year. Globe shaped of clear bright yellow or straw color, has small neck and ripens up hard. Flesh creamy white, with a mild and agreeable flavor, almost equal to the imported Onions. Pkt., 5c; oz., 15c; ½ lb., 50c; lb., $1.50, postpaid.

LEE'S YELLOW GLOBE—The bulbs are large, uniformly globe shaped with small neck. The largest diameter below the center of the bulb, color rich yellow with tinge of orange. Flesh creamy white, mild and of very fine quality. Pkt., 5c; oz., 15c; ½ lb., 50c; lb., $1.50, postpaid.

AUSTRALIAN BROWN—Of medium size, round, brownish yellow, very early and probably the best keeper of all. Pkt., 5c; oz., 15c; ½ lb., 50c; lb., $1.50, postpaid.

Onions can be grown very successfully in many parts of the South and they usually command a good price. It may not be generally known but there is no crop so dependent on good seed as Onions. Do not be influenced by cheaply priced seed. Increased yearly sales testify to the quality of our seed. Note liberal offer at bottom of this page.

LARGE RED WETHERSFIELD—The most widely cultivated red variety; a sure and heavy yielder; the best keeper; grows to an immense size, solid, oval shaped, flattened on top; skin purplish red, smooth and glossy; flesh white. Does best on rich, moderate dry soil, but on low muck land it is more apt to form large necks than the Danvers. There is no better sort for dry soils. Pkt., 5c; oz., 15c; ½ lb., 50c; lb., $1.75, postpaid.

SOUTHPORT LARGE RED GLOBE—With the exception, perhaps, of some of the white varieties, there is no Onion that realizes such high prices as this, its beautiful globe shape and rich purplish crimson color making it extremely desirable. It is a good keeper and of excellent quality. Pkt., 5c; oz., 20c; ½ lb., 60c; lb., $2.00, postpaid.

SOUTHPORT WHITE GLOBE—Large globe-shaped Onion, firm, fine-grained, mild flavor. This is one of the handsomest Onions grown, of beautiful shape, clear white skin and commands the highest market price. Pkt., 5c; oz., 25c; ½ lb., 50c; lb., $2.50, postpaid.

WHITE PORTUGAL, or SILVERSKIN—The bulbs are flat. It is of a mild, pleasant flavor and is a splendid variety, both for home use and the market gardener. It is extensively used for growing sets; also used largely for pickling. Pkt., 5c; oz., 25c; ½ lb., 50c; lb., $2.75, postpaid.

SPECIAL OFFER In quantities of 5 pounds or over deduct 10c per pound from above prices. We pay postage.
LEES SUPERIOR BERMUDA ONION SEED

GENUINE SEED IMPORTED DIRECT FROM THE CANARY ISLANDS—Very early sorts, grown extensively in the Bermudas and southern parts of the United States for early shipping to Northern markets.

CRYSTAL WHITE WAX—Large, pure white, flat Onion, which has become very popular with the large growers of Onions in the South. It does very well under Northern conditions and produces one of the mildest and sweetest of them all. It is very fine for slicing, the color being so clear and pure. Our stock is genuine. Pkt., 10c; oz., 60c; 1 lb., $2.00; lb., $7.00, postpaid.

YELLOW BERMUDA—The bulbs are quite broad and flat form. The color is not a clear white, as in our American varieties, but rather a pale straw; flesh crisp, solid and mild in flavor. Pkt., 10c; oz., 40c; 1 lb., $1.35; lb., $4.50, postpaid.

RED BERMUDA—Pale waxy red, similar in form and early ripening to the Bermuda Yellow, but grow larger in size, ranging from 3 to 4 inches in diameter; very flat and of a light pink color. The flesh is white, slightly suffused with pink. Pkt., 10c; oz., 40c; 1 lb., $1.25; lb., $4.50, postpaid.

ONION SETS FOR SPRING PLANTING

Prices are based on standard weight of 32 pounds per bushel. Bushel prices quoted on request.

RED BOTTOM SETS ...............per qt., 20c, postpaid. By Express, per qt., 15c; per gal., 50c; per pk., 90c.

YELLOW BOTTOM SETS ..........per qt., 20c, postpaid. By Express, per qt., 15c; per gal., 50c; per pk., 90c.

WHITE BOTTOM SETS .............per qt., 20c, postpaid. By Express, per qt., 15c; per gal., 50c; per pk., 90c.

OKRA OR GUMBO

One ounce sows 40 feet of drill, 15 pounds per acre. Plant in April or May. Matures in 60 or 70 days from planting.

CULTURE—When the ground has become warm, sow thickly in drills 2 feet apart, and when large enough, thin out to 8 inches apart in the rows.

WHITE VELVET—The plant is of medium height, bearing a large crop of white, smooth pods, which retain their tenderness until nearly full sized. Pkt., 5c; oz., 10c; 1 lb., 25c; lb., 60c, postpaid.

MAMMOTH LONG POD—Plant is of medium height, producing beautiful long, slender, deep green pods, which remain tender a long time. Pkt., 5c; oz., 10c; 1 lb., 25c; lb., 60c, postpaid.

DWARF WHITE—The plants are 2 feet high and are very productive. Mature pods long, greenish white, very thick and fleshy. Pkt., 5c; oz., 10c; 1 lb., 25c; lb., 60c, postpaid.

KEEP PLANTING

throughout the season and have a succession of crops following each other. Several crops of Lettuce, Radish, Beet, Beans, and other vegetables, can be raised on the same plot of ground.

VEGETABLE PLANTS AND ROOTS

PLEASE NOTE:—We send Plants and Roots by mail or express only at buyer's risk. Special prices in larger quantities. Cabbage, Egg Plant, Pepper and Tomato Plants listed on this page are grown in Fort Smith and are ready for shipment during March, April and May. For prices on FROST PROOF CABBAGE PLANTS refer to page 13.

CABBAGE PLANTS—Grown in Fort Smith under our personal supervision. The varieties are: Early Jersey Wakefield, Charleston Wakefield, Early Dwarf Flat Dutch, Early Summer and Copenhagen Market. These plants are grown in cold-frames and hardened off and are practically frost-proof. We have large quantities now growing and will be ready for shipment about February 25th. We sell annually large quantities of these choice plants and they give universal satisfaction. If interested in quantities larger than quoted, please write us for special quotation. Per doz., 20c; postpaid; per 100, postpaid, 75c; per 1,000, $5.00.

EGG PLANTS (New York Improved Large Purple), Ready in April. Per doz., 40c, postpaid; per 100, $2.50, postpaid.

HORSE RADISH SETS—Per doz., 30c; per 100, $2.00, postpaid.

PEPPER PLANTS—Ready in April. Per doz., 40c; per 100, $2.50, postpaid.

RHUBARB ROOTS—Refer to page 28 for prices.

SWEET POTATO SLIPS—Yellow Tarn, Nancy Hall. Market price.

TOMATO PLANTS—Ready in April. Can supply any of the varieties listed on pages 30 and 31. Per dozen, 30c, postpaid. Per 100, $1.75.

HOW TO ORDER—Refer to inside of front cover page.
LEE’S GARDEN OR ENGLISH PEAS

NOTE—All our Seed Peas are grown far North, and are carefully hand-picked. They are grown from selected strains, and are critically rogued during the growing season. When ordered by freight or express, customer pays charges.

EXTRA EARLY VARIETIES.

WORLD’S RECORD—A new variety on the order of Gradus, which it resembles in many ways, though slightly earlier, more dwarf and productive. Height 2 feet. Vines moderately stout, light green; pods medium green. $1.

LEE’S FIRST AND BEST—Grows 2½ to 2 feet in height. The earliest and most even strain of white extra early peas, maturing so well together that sometimes a single picking will secure the entire crop. Can be planted much earlier than the wrinkled varieties, frequently before the sharp frosts are over. With the possible exception of the Alaska, this is the most desirable sort to plant for early market or for shipping. Lb., $1; 2 lbs., 50c; postpaid; not postpaid, 10 lbs., $2.00; 100 lbs., $18.00.

EARLIEST OF ALL, OR ALASKA—By careful selection and growing we have developed a stock of this smooth blue Pea of unequaled evenness in growth of vine and early maturity of pods which are filled with medium-sized, bright green large pods. Vines 2½ to 3 feet high. Seed small, smooth, and bluish green in color. Matures all the crop at once and is an invaluable variety for market gardens and canning. Lb., 50c; 2 lbs., 50c; postpaid; not postpaid, 10 lbs., $2.50; 100 lbs., $27.50.

NOTT’S EXCELSIOR—Height 12 inches. The best early dwarf wrinkled Pea. It combines the good qualities of the American Wonder and Little Gem Peas. The vines are larger and more productive than the American Wonder and earlier than the Little Gem. For the home garden where brush or sticks are not available, and for those who desire an early dwarf Pea of long bearing qualities, this is probably the best sort in cultivation. Mostly noted however for its delicious flavor which is unsurpassed by any other sort. We recommend it as the best in its class. Lb., 50c; 2 lbs., 35c; postpaid; not postpaid, 10 lbs., $2.50; 100 lbs., $22.50.

LITTLE GEM—Height 16 to 18 inches. The vines are of dwarf growth and produce an abundance of round, well-shaped pods 2½ to 3 inches long, only three days after the American Wonder. The Peas are green, wrinkled, of sweet, delicious flavor and excellent quality. Lb., 50c; 2 lbs., 35c; postpaid; not postpaid, 10 lbs., $2.50; 100 lbs., $25.00.

AMERICAN WONDER—Height 12 inches. Vines covered with well-filled pods containing five to eight large, exceedingly sweet, tender and well-flavored Peas. Seed medium-sized, generally flattened, wrinkled and pale green. Lb., 65c; 2 lbs., 65c; postpaid; not postpaid, 10 lbs., $2.50; 100 lbs., $28.00.

MAIN CROP AND LATE PEAS

TELEPHONE—Immensely productive. Leaves coarse, vines grow 4 feet high. They produce enormously large pods. The pods are very large, so that Earlies of excellent quality that “Telephone” has become one of the most prominent late Peas to be grown for market Lb., 50c; 2 lbs., 41c; postpaid; not postpaid, 10 lbs., $2.50; 100 lbs., $23.00.

BLISS EVERBEARING—Medium early and remains a long time bearing. Vine stout, about 20 inches high; bears six to ten broad pods, filled full of elegant peas; pea large, tender and of good flavor. Lb., 65c; 2 lbs., 65c; postpaid; not postpaid, 10 lbs., $2.50; 100 lbs., $23.00.

CHAMPION OF ENGLAND—¾ feet. A standard late variety, adapted to the requirements of the private planter and professional gardener. Pea dark green. Lb., 50c; 2 lbs., 45c; postpaid; not postpaid, 10 lbs., $2.30; 100 lbs., $23.00.

WHITE MARROWFAT—Grow 4 to 5 feet in height. Pods large, round, light green and well filled. Excellent for Summer crop. Lb., 50c; 2 lbs., 465c; postpaid; not postpaid, 10 lbs., $2.50; 100 lbs., $23.00.

GRADUS—The vine is similar in appearance to the Telephone, but only 3 to 3½ feet high. The immense pods are as large as those of the Telephone, but are uniformly well-shaped, handsome and more attractive than those of the first earlies. The pea are very large, of splendid quality and beautiful color, which they retain after cooking. Lb., 40c; 2 lbs., 55c; postpaid; not postpaid, 10 lbs., $2.00; 100 lbs., $27.00.

HOW TO ORDER—Refer to inside of front cover page.
LEE'S DEPENDABLE PEPPER SEED

Peppers are more tender than most vegetables. The seed should be sown in a hot-bed, cold-frame, or, if no other convenience, a box in the window, and transplanted about the last of May. They can be sown in the open ground when the weather becomes warm and settled. Warm, mellow soil, well fertilised, should be used.

One ounce of seed for 1,500 plants.

ROYAL KING (No. 2)—It is the utmost that can be obtained in the Bell Pepper type, in that it is thicker meated, grows larger, very mild, perfectly sweet and free from pungency. An excellent shipper, makes a fine appearance and commands the top prices in the market. We offer this excellent pepper and recommend it as the best in its class. It is the very pepper you have been looking for. Pkt, 10c; oz., 50c, postpaid.

PIMENTO (No. 4)—While this pepper is excellent for home use, it is especially desirable for canners. The meat is several times as thick as the bell pepper type and yields fully 50 per cent more edible product. It is the mildest of all peppers and is very sweet, delicious, and is free from all pungency. Pkt, 10c; oz., 50c; 1 lb, $1.75, postpaid.

RED CHILI—A late variety; used in the manufacture of pepper sauce. Exceedingly pungent when ripe. Pkt, 10c; oz., 50c, postpaid.

LONG RED CAYENNE (No. 3)—Beautiful and productive. Fruit 4 inches long, bright red, pointed pod, flesh thick and pungent. Pkt, 10c; oz., 50c; 1 lb., $1.75, postpaid.

TRANSPLANTED PEPPER PLANTS—By mail, per doz., 40c; per 100, $2.50, postpaid.

TRUCKERS AND MARKET GARDENERS

I have served you continually for TWENTY-ONE YEARS. I have studied the needs of the Southern planter. I know your wants. Our success is due to our ability to distribute good seed.

PARSLEY

One ounce will sow 150 feet of drill.

CHAMPION MOSS CURLED—The plant in appearance resembles a tuft of green moss. The leaves are extra large, extra dark green, tender, crinkled and curled. Pkt, 5c; oz., 10c; 1 lb, 25c; 1 lb, 75c, postpaid.

DOUBLE CURLED—Pkt, 5c; oz., 15c; 1 lb, 55c; 1 lb, 85c, postpaid.

NORCROSS CULTIVATORS

A light durable all-steel hand cultivator especially desirable for the use of women. They are high quality, inexpensive little implements that fill practically every need in cultivating and weeding. Refer to page 57 for price.

HOW TO ORDER—Refer to inside of front cover page.

LEE'S GOLDEN QUEEN—Similar in shape to our Royal King, but of rich, creamy color, flesh thick, and surpasses all other Peppers in quality, having an exceedingly mild, sweet and delicious flavor. This variety is very popular with our customers, but owing to crop failures we have been unable to supply any of this seed the past few years. We offer a limited quantity of seed grown under special contract. Pkt, 10c; oz., 75c.

CHINESE GIANT (No. 1)—The largest of all Peppers. Flesh is thick, tender, mild and sweet, and is unexcelled for salad or stuffed as mangos. They can be sliced and eaten like tomatoes. Pkt, 10c; oz., 65c, postpaid.

SWEET MOUNTAIN, or SPANISH MAMMOTH—It is very large and long, very smooth and handsome. Flesh very thick, sweet and mild flavored. Pkt, 10c; oz., 50c, postpaid.

RUBY KING—The pods are 5 to 6 inches long. Flesh exceedingly thick, sweet, and so mild that it is often sliced as salad. Splendid stuffed as mangos. Pkt, 10c; oz., 50c, postpaid.

LARGE BELL, or BULL NOSE—Fruit large, with thick, mild flesh, of excellent quality for use in salads and pickles. Pkt, 10c; oz., 50c; 1 lb, $1.75, postpaid.

PARSNIPS

An all-steel Tool especially designed for the home garden. Our leader for twenty years. Each, $7.50.
Lee’s Dependable Pumpkin Seed

More pumpkins should be grown by the South ern farmers. They are easily grown, make de-
licious pies, are good for cows to eat and command a ready sale.

Avoid planting Pumpkin in the garden, as they will mix with cucumbers, melons, and other vines. Usually they are planted in the cornfield, dropping three or four seeds in every fourth hill. Pumpkins make excellent feed for hogs and cattle, and should be grown by every planter. One pound of seed will plant 500 to 300 hills.

LARGE CHEESE or KENTUCKY FIELD—A fine Pumpkin for the table and the best Pumpkin that grows for stock feeding. Large, round, flattened, hardy and productive. About 2 feet in diameter. A fine keeper. Thick flesh of extra fine quality. Pkt., 5c; oz., 10c; § lb., 15c; lb., 50c, postpaid.

CONNECTICUT FIELD—An immensely productive, large orange-colored field Pumpkin usually grown for stock feeding; makes good pies. Pkt., 5c; oz., 10c; § lb., 20c; lb., 60c, postpaid.

JAPANESE PIE—Similar in shape and size to the well-known Cushaw but the skin is deep green, with dark stripes, turning to a rich golden yellow. Fruits mature early; the large neck is solidly meaty, and seeds are marked with curious indentations resembling the characters of the Chinese alphabet. Flesh deep yellow, of fine quality. Pkt., 5c; oz., 15c; § lb., 50c; lb., $1.75, postpaid.

TENNESSEE SWEET POTATO—Bell shape, medium size, thick flesh, skin creamy white, fine-grained, sweet, delicious. Very fine for pies. Pkt., 5c; oz., 15c; § lb., 50c; lb., $1.75, postpaid.

MAMMOTH GOLDEN CUSHAW—The genuine Cushaw; flesh yellow, fine-grained, very sweet and excellent for pies and good baking. Delicious flavor. Pkt., 5c; oz., 15c; § lb., 50c; lb., $1.75, postpaid.

IMPROVED GREEN-STRIPE

CUSHAW—A crook-necked variety, with green-and-white-striped skin. The flesh is of rich yellow color, solid, fine-grained, very thick and sweet. Pkt., 5c; oz., 15c; § lb., 50c; lb., $1.75, postpaid.

WHITE CUSHAW, or CROOKNECK—Fine for table use, as well as for stock feeding. The fruits have a hard creamy white shell, grow about 2 feet long, and the thick meat is of excellent quality. Pkt., 5c; oz., 15c; § lb., 50c; lb., $1.75, postpaid.

SUGAR OR PIE—Not a large pumpkin—averaging 10 inches in di-
ameter—but one of the sweetest and best for pies. It is fine-grained, deliciously sweet and a good keeper; flesh rich, deep orange-yellow in color. Pkt., 5c; oz., 10c; § lb., 20c; lb., $1.25, postpaid.

LEE’S SUGAR PUMPKIN

OR SWEET SQUASH

Plant in hills 4 feet apart. One ounce will plant 25 hills.

This new Sugar Pumpkin or Squash was offered to our custom-
ers for the first time last season. Have received many favorable reports of its good quality and again offer it this season. An early handsome variety. Skin deep green, turning brown when ripe. The flesh is rich golden yellow, thick-meat and fine-
grained. Makes fine pies, being very sweet requires no sugar. Pkt., 5c; oz., 20c; § lb., 75c, postpaid.

We pay Postage on Packets, Ounces, Quarter Pounds and Pounds of Garden Seeds, and up to and Including Two Pounds of Peas, Beans and Sweet Corn. In larger quantities refer to Parcel Post rate on page 5.

LEE’S MAMMOTH PACKET SEEDS contain more seed than is usually supplied in Packets.

HOW TO ORDER—Refer to inside of front cover page.
LEE’S RADISH SEED

For forcing sow in hotbed or under glass in rich, sandy soil made perfectly level. Scatter evenly over surface from fifty to one hundred seeds to the square foot and cover with one-half inch of soil sifted on. Careful watering to keep soil moist, even, moderate temperature and good ventilation are required for rapid and best root development. If the bed is a good one the whole crop can be marketed in twenty-one to forty days after planting.

One ounce to 100 feet of drill; 9 or 10 pounds per acre, in drills.

ROUND AND OLIVE SHAPED SORTS

LEE’S SELECTED SCARLET GLOBE—For forcing in greenhouses, hot-beds and cold frames, and for sowing in private gardens this is the perfect sort. It is very early, and can be forced in eighteen days and will stand a great amount of heat without becoming lily. Roots round, slightly oval shaped; color rich bright scarlet; flesh white and tender. Pkt., 5c; oz., 15c; l lb., 45c; lb., $1.00, post-paid.

EARLY SCARLET TURNIP (White Tipped)—The best shipping radish. A splendid forcing sort, perfectly round or globe-shaped, deep scarlet at top, blending to pure white at bottom. Flesh white and of splendid quality. The top growth is very small. Very early, ripening in about twenty-one days. We have a splendid strain of seed of this desirable Radish. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid; by express, 10 lbs., 75c lb.

EARLY SCARLET TURNIP RADISH—A very early, small, round Radish, entire Radish is a rich scarlet color. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid.

FRENCH BREAKFAST—A quick-growing, medium-sized Radish, rather oblong in shape; color a beautiful scarlet, except near the tip, where it is pure white. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid.

EARLY WHITE TURNIP—A medium-sized, round variety, grown very largely for summer use. It is a small top and pure white inside; the flesh is waxy, mild and crisp. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid.

CRIMSON GIANT—An exceptionally large round Radish. Nearly globe-shaped; of beautiful crimson color. It often grows from 1½ to 1½ inches in diameter before becoming lily. Early, remaining in condition for a long time; a desirable variety for general outdoor planting; also suitable for forcing where a large round Radish is desired. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid.

We recommend customers, when ordering in small way, to select Garden Seeds in ounce quantities. In this way you receive excellent values and sufficient quantity for successive plantings throughout the season.

LONG RADISHES

LONG SCARLET SHORT TOP—A standard popular sort. Grows to 6 inches in length, matures in twenty-five days and can be green before it is fully grown. The roots grow half out of the ground and are very uniform in shape, smooth and bright red in color. It remains crisp and tender until fully grown. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid.

WHITE ICICLE—A beautiful transparent white variety, about 3 inches long, and 1-inch in diameter, with small tops; very crisp and brittle, and remains in good condition a long time; does not get pithy. Suitable for forcing. The best white Radish. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid.

WHITE STRASBURG—One of the best for outdoor sowing in the Summer. Roots are bright crimson in upper portion, shading to white at the tip. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid.

WHITE STRASBURG—One of the best for outdoor sowing in the Summer. Roots are bright crimson in upper portion, shading to white at the tip. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid.

GIANT WHITE STUTTGART—Skin and flesh white, of vigorous growth, maturing in five weeks. Remains crisp and brittle at all stages of growth. Remarkably slow in going to seed even in the severest heat. Pkt., 5c; oz., 15c; l lb., 55c; lb., $5c, postpaid.

TRUCKERS AND MARKET GARDENERS

Wishing to buy Seed in quantity will please mail us a list of your probable wants so that we can quote you special prices. Use quotation sheet, page 61.

HOW TO ORDER—Refer to inside of front cover page.
LEE'S RADISH SEED—Continued

WINTER RADISHES

CHINESE ROSE WINTER—One of the very best for Fall and Winter use, and popular with market gardeners. Bright rose color; flesh white and firm, of superior quality. Pkt., 5c; oz., 15c; ½ lb., 35c; lb., 55c, postpaid.

CHINESE WHITE WINTER OR CALIFORNIA MAMMOTH WHITE WINTER—The well-known and popular Winter variety. Clear white, about four inches long and half stump-rooted. Keeps firm and crisp until it runs to seed. It is a good cooking variety, and when cooked the flavor resembles turnip. Pkt., 5c; oz., 15c; ½ lb., 35c; lb., 55c, postpaid.

ROUND SCARLET CHINA—Fine round roots for Winter, a good keeper. Pkt., 5c; oz., 15c; ½ lb., 35c; lb., 55c, postpaid.

LONG BLACK SPANISH WINTER—Like Round Black Spanish Winter, but the roots are longer and perhaps slightly milder in flavor. Pkt., 5c; oz., 15c; ½ lb., 35c; lb., 55c, postpaid.

RUBARB OR PIE PLANT

One ounce will produce 300 to 500 plants.

Good plants are easily grown in any garden soil. Sow seed thinly in shallow drills a foot apart, thin to 4 to 5 inches. Keep soil loose and free from weeds. The plants are liable to vary considerably. Pick out the strongest and best. In Fall or Spring following, transplant to the permanent bed, 4 feet apart each way, in deep warm and very rich soil. For Winter forcing take up two-year roots in Fall, then bed close together on cellar bottom or under greenhouse bench in the dark.

VICTORIA—Leaf stalks tall and large. Skin thick and red-stained. Pulp quite acid. Productive and profitable for market gardeners. Pkt., 5c; oz., 15c; ½ lb., 35c; lb., $1.50, postpaid.

RHUBARB ROOTS

When only a few plants are required we suggest the purchase of roots instead of seed. For the best results the roots should be planted in the Fall. In this manner you can obtain early cutting the following spring. Strong two-year roots. Each, 25c; per doz., $2.25, postpaid.

LEE'S DEPENDABLE SPINACH SEED

Should be grown in every garden for greens. It is very healthful and should be freely used, as it is easily raised, requires little cultivation, and seed is easily sown. It can be sown in drills, which should be about 12 inches apart, covering the seed with an inch of soil, or it can be sown broadcast. Can be sown in February, March and April or in September or October, for late Fall and early Spring use. One ounce of seed will plant 100 feet of drill; 10 pounds broadcast will plant an acre.

WE ARE LARGE DEALERS IN SPINACH SEED. IF INTERESTED IN QUANTITY PRICES, WRITE.

BLOOMSDALE, or SAVOY LEAVED—The earliest variety and one of the best to plant in the Spring or in Au-

spinach—Bloomdale.
LEEE'S SUMMER BUSH SQUASH

SUMMER SQUASH REQUIRES 1 OUNCE TO 30 HILLS; WINTER SORTS, 1 OUNCE TO 15 HILLS. THREE TO FOUR POUNDS PER ACRE. PLANT IN MAY OR JUNE.

CULTURE—After danger of frost is past, plant in a warm, well-pulverized, rich soil, mixing a shovelful or two of well-rotted manure with the soil of the hill. Plant four or six seeds to the hill, the running sorts 6 inches apart, the climbing sorts 2. When well grown, thin out, leaving three of the strongest plants in each hill.

EARLY WHITE BUSH SCALLOP (Also called PATTY PAN)—A well-known variety of dwarf habit and upright growth. Surface comparatively smooth; color creamy white. The variety matures fruits a little earlier than Mammoth White Bush Scallop.

MAMMOTH WHITE BUSH—An early round, flat Squash; color clear white, handsomely scalloped. Largely planted in every section of the country. One of the very best of the early Summer varieties.

YELLOW BUSH SCALLOP—A very early, flat scallop variety of large size; color yellow; flesh pale yellow and well flavored. Has a very small seed cavity. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.50, postpaid.

HUBBARD—One of the best of the Winter Squashes; flesh bright orange-yellow, fine grained, very dry, sweet and richly flavored; keeps well through the winter, boils or bakes exceedingly dry, and is esteemed by many to be as good baked as Sweet Potato. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.50, postpaid.

WHITE SUMMER CROOKNECK—The fruits are similar in size and shape to the yellow Summer Crookneck, but of an ivory white and unsurpassed in quality. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.50, postpaid.

GOLDEN SUMMER CROOKNECK—Early and prolific. The fruits are of the true crookneck type, heavily warded and of light golden color. Fruits when matured are about 1 foot long. One of the most popular sorts for home and market. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.50, postpaid.

SALSIFY, OR OYSTER PLANT

Sow in rows about 2 feet apart. Thin out the plants to 6 inches apart. Perfectly hardy and can remain in the ground all Winter.

One ounce will sow 100 feet of drill.

MAMMOTH SANDWICH ISLAND—Grows very large here, resembling a good-sized parsnip; well flavored, mild. Pkt., 5c; oz., 30c; ¼ lb., 75c; lb., $2.00, postpaid.

SORREL

The improved varieties of Sorrel, when well-grown and cooked like Spinach, makes a palatable dish. Sow in drills in early Spring and thin the seedlings to 6 or 8 inches apart in the row.

LARGE-LEAVED FRENCH—The best garden variety, having large, pale green leaves of fine quality. Pkt., 5c; oz., 15c; ¼ lb., 50c, postpaid.

JAPANESE SALAD PLANT—Can be grown in beds like asparagus. It differs from asparagus in that asparagus shoot tips are only edible, the whole of the Salad Plant Stalk is stringless and tender. The shoots are white. When made into soup, the whole stalk is used, or can be served like asparagus. A favorite way of serving is to slice the shoots into thin shavings, chill them on ice and serve with salad dressing. Beds usually continue bearing from eight to ten years without replanting. Shoots six feet long have been produced in a single season from seed. Pkt., 15c; ½ oz., 50c; oz., 60c, postpaid.

GARLIC

Garlic is a bulbous-rooted plant of the Onion family, with a strong, penetrating odor, but much esteemed by some for flavoring soups, stews, etc. We frequently receive orders for Garlic seed, but we can supply bulbs only. Prepare the ground the same as for onions and plant the bulbs in drills 8 inches apart and 4 inches apart in the rows, covering 2 inches deep. When the leaves turn yellow, take up the bulbs, dry in the shade and lay them up in a dry loft as you would onions. ¼ lb., 25c; lb., 75c, postpaid.

TOBACCO

SWEET ORONOCC—Used for first-class plug-fillers and makes, when sun cured, the best natural chewing leaf. A favorite for the “Homespun” wherever known. Known as “Little Oronoco” in some localities. Pkt., 10c; oz., 50c; ¼ lb., $1.50, postpaid.

Havana—Used for cigar purposes. Pkt., 10c; oz., 50c; ¼ lb., $1.50, postpaid.

CONNECTICUT SEED LEAF—Suitable for cigar fillers. Pkt., 10c; oz., 50c; ¼ lb., $1.50, postpaid.

BUG DEATH

A non-poisonous insecticide. Sure death to Melon Bugs. More largely used for this purpose than anything else. Refer to page 60 for prices.

Squash, Early White Bush Scallop

Golden Summer Crookneck.
LEE'S SUPERIOR TOMATO SEED

Tomatoes are to be found in every garden. Can be grown anywhere and under most any condition. If the following rule is followed in transplanting your plants, they will not only produce a stronger plant but will bear fruit a much longer time. Dig a hole about 4x4 inches, place at the bottom a small quantity of fertilizer, “stable manure preferred.” Cover with soil so that the roots of the plant will not come in contact with the fertilizer. Transplanting in this manner allows the roots ample room to grow and will be found to hold the moisture much better. For best results as to amount and perfection of fruit it is advisable to train up and trim the vines, especially if patch is rather small. We offer the best of the varieties to date.

For early crops, sow in hot-bed, green house, or inside not fall below 65 degrees in February or March, transplanting—to secure stockiness—when 3 inches high, to pots, cold-frames, or other parts of the bed, and about 5 inches apart. After all danger of frost is over, transplant finally to open ground, 4 to 6 feet apart. One ounce will produce 2,000 plants.

LEE'S MARKET GARDENER

The Best Early Tomato

LIVINGSTON'S BEAUTY—(Color Purple.) One of the oldest and still very popular in the great shipping centers for reason of its being always exceptionally smooth and uniform in size. It is one of the best main crop sorts. Pkt. 5c; oz. 30c; ¼ lb., 50c; lb., $3.00, postpaid.

ACME—(Color Purple.) Vine large, hardy and productive, ripening its first fruit very early and continuing to bear abundantly until cut off by the frost. Fruit purplish pink, in clusters of four or five, fine, round, smooth and of good size; free from cracks, and stands shipment well. Flesh solid and of excellent flavor. Pkt. 5c; oz. 30c; ½ lb., 50c; lb., $3.00, postpaid.

NEW STONE—(Color Deep Scarlet.) The greatest of all canning Tomatoes. One of the heaviest and most solid fruited of the large Tomatoes of good quality. Our stock is distinctly superior to most of that offered under this name. Vine vigorous and productive. Fruit round, slightly flattened, very large and astonishingly heavy. Pkt. 5c; oz. 30c; ½ lb., 50c; lb., $3.00, postpaid.

REDFIELD BEAUTY—(Color Crimson with a slight tinge of Purple.) Grows in clusters of three to five fruits. Unexcelled for toughness of skin and solidity. A good shipper. Redfield Beauty is extensively grown in many parts of the southern states and very popular where known. Pkt. 5c; oz. 30c; ½ lb., 50c; lb., $3.00, postpaid.

DWARF CHAMPION—A purplish pink variety, forming a strong, erect, bushy plant. Often sold as a “tree” Tomato. Fruit smooth, medium sized, solid and good flavor. Desirable for forcing, as it can be planted close to the glass and more closely on the bench than the tall-growing kinds. Pkt. 5c; oz. 30c; ¼ lb., $1.00; lb., $3.50, postpaid.

LEE'S MARKET GARDENER—(Color Purple.) We believe this to be the best early Tomato we have ever offered. It is earlier in maturing than the Beauty, the fruits produced average more nearly globular-shaped. One of the most valuable shipping Tomatoes. The fruits are of good size throughout the season, which is unusual in so early a variety. We recommend this as the best Tomato of its class. Pkt., 10c; oz., 40c; ¼ lb., $1.25, postpaid.

EARLIANA—One of the earliest smooth, bright red Tomatoes of good size. The plants are compact in growth, with short, close-jointed branches, setting fruits very freely. The Tomatoes are quite uniform in size and of smooth, irregular form, averaging 3 inches in diameter and from 2 to 2½ inches in depth. They are fleshly, solid and excellent for shipping purposes. Pkt., 5c; oz., 30c; ¼ lb., 50c; lb., $3.00, postpaid.

JOHN BAER—An extra early Scarlet-fruited variety, and one of the largest of the early sorts. They are nearly round, smooth, firm, and of excellent quality. Much in demand where known. Pkt., 5c; oz., 30c; ½ lb., $1.00; lb., $3.50, postpaid.

JUNE PINK—Ripens as early as Sparks' Earliana and ten days to two weeks earlier than Chalk's Early Jewel. It is an enormous bearer, clusters of six to ten fruits being borne both at the crown and at the forks of the branches. The fruit is of medium size, uniform, smooth and attractively shaped. It will average 2½ to 3 inches in diameter and 2 to 2½ inches in depth. The skin is reasonably tough, so that it is excellent for shipping. In color it is a bright, pleasing pink, and in markets where a pink Tomato is desired will bring more in price than any red variety. Pkt., 5c; oz., 30c; ½ lb., $1.00; lb., $3.50, postpaid.
LEE'S SUPERIOR TOMATO SEED—Continued

PONDEROUSA

The largest fruited and meatiest Tomato in cultivation, and of fine quality for slicing.

The vines are of strong, rather open growth; fruits largely oblong in form, deep through and generally ridged or ribbed, deep purple in color. Solid, fleshy, with small seed-cells; of fine sweet flavor. Planted in good soil, fruits frequently attain a weight of one pound or more. For reason of its strong growing habit it seems to have the power to resist hot, dry weather to a remarkable degree. Especially recommended for the home garden where a solid meated tomato is desired. Pkt., 10c; oz., 40c; lb., $1.00, postpaid.

EARLY DETROIT—The vine is a better yelded and more vigorous than that of the Acme. Not only are more fruits produced, but they average more nearly globe-shaped, are heavier and are equally as firm, smooth and suitable for shipping. The fruits are of good size throughout the season, which is unusual for so early a variety. Pkt., 5c; oz., 30c; 1 lb., $1.00; lb., $3.50, postpaid.

MATCHLESS—A very popular Tomato for canning. Fruits large, very smooth and symmetrical, ripening well to stem. Flesh rich, bright red color and of fine quality. Pkt., 5c; oz., 30c; 1 lb., 90c; lb., $3.00, postpaid.

GOLDEN QUEEN, (Queen of the Yellows)—Solid, smooth, large in size, and ripens early. Makes a handsome, rich preserve. This Tomato should be grown in every home garden; its flavor is better and more delicate than that of the red varieties, the flesh finer-grained and very tender. Pkt., 10c; oz., 40c; lb., $1.25, postpaid.

SMALL-FRUITED TOMATOES

For Pickles, Preserves, Etc.

PEACH—Desirable for preserving or for table decoration. The fruits resemble a peach in shape and the color a light terra cotta red with a delicate bloom. The flesh is tender and of good flavor. Pkt., 10c; 1 oz., 30c; oz., 50c, postpaid.

RED PEACH—Used for preserves and to make "tomato figs." Fruits bright red, distinctly pear shaped and of excellent flavor. Pkt., 10c; 1 oz., 30c; oz., 50c, postpaid.

YELLOW PLUM—Fruits plum shaped, of clear, deep yellow color; flesh yellow and finely flavored. Esteemed for preserves. Pkt., 5c; 1 oz., 30c; oz., 50c, postpaid.

RED CHERRY—Fruits small, about five-eighths of an inch in diameter, perfectly round and smooth. Fine for pickles and preserves. Pkt., 10c; 1 oz., 30c; oz., 50c, postpaid.

TRANSPLANTED TOMATO PLANTS—These plants are grown from seed supplied by us. Write for special quotations on larger quantities. Per dozen, 30c; per 100, $1.75, by express not prepaid. Special prices in lots of 1,000 or over.
LEE’S TURNIP SEED

When five or ten pounds, or larger quantities, are required, special prices will be quoted.

Sow broadcast or in drills from 12 to 18 inches apart, and ½ inch deep. One ounce of seed will sow 300 feet of row; and one to two pounds are required for an acre, broadcast.

LEE’S EARLY MARKET—New. A valuable Spring sort, matures quickly. Flat, round, pure white, fine grained and excellent quality. Especially recommended for the market. Pkt. 5c; oz. 20c; ½ lb., 50c; lb., $1.50, postpaid.

EXTRA EARLY WHITE MILAN—Very early. Tops very small, distinctly strap-leaved and growing very erect and compact. Bulbs form earliest of any sort. The clean white roots are smooth, flat, cylindrical and handsome in appearance. The flesh is white, tender and sweet. Pkt. 5c; oz. 16c; ½ lb. 40c; lb., $1.25, postpaid.

EXTRA EARLY PURPLE-TOP MILAN—Very early. A white variety, purple top and strap leaf. Remains in good condition a long time. Pkt., 5c; oz. 16c; ½ lb. 40c; lb., 75c, postpaid.

EARLY WHITE FLAT DUTCH STRAP-LEAVED—Matures only a week after the earliest Milan, but keeps much longer in fine condition. The skin is pure white, the flesh is mild, juicy and of best table qualities. Pkt., 5c; oz. 16c; ½ lb. 25c; lb., 75c, postpaid.

PURPLE TOP WHITE GLOBE—Also known as RED TOP WHITE GLOBE. The most popular market variety and equally desirable for the home garden. The roots are large purple or dark red above ground and white below, flesh white and fine-grained—a good keeper. Pkt., 5c; oz. 10c; ½ lb. 25c; lb., 75c, postpaid.

POMERANEAN WHITE GLOBE—One of the most productive kinds, the roots will frequently grow to twelve pounds in weight. Skin very white and smooth, used for stock feeding and desirable for table use. Where the winters are mild the tops are used for greens. Pkt., 5c; oz. 10c; ½ lb. 25c; lb., 75c, postpaid.

NEW WHITE EGG—Nearly oval or egg-shaped. Flesh firm and fine grained and of snowy whiteness. Particularly desirable for table. Pkt., 5c; oz. 10c; ½ lb. 25c; lb., 75c, postpaid.

PURPLE TOP YELLOW ABERDEEN—Roots medium sized, round; flesh pale yellow, tender and sugary; the plant is hardy, productive and keeps well. It is an old, esteemed variety, considered as approaching very nearly to the Rutabaga in hardness and firmness of texture. It is valuable for feeding cattle, for which use it is extensively grown. Pkt., 5c; oz. 10c; ½ lb. 25c; lb., 75c, postpaid.

LARGE AMBER GLOBE—One of the best yellow-fleshed varieties for a field crop for stock. Pkt., 5c; oz. 10c; ½ lb. 25c; lb., 75c, postpaid.

SEVEN TOP—Does not produce a good root, but is extensively grown in the South for the tops, which are used as greens. Very hardy and will grow all winter. Pkt., 5c; oz. 10c; ½ lb. 25c; lb., 75c, postpaid.

SOUTHERN PRIZE—Superior to Seven Tops as usually sold and extensively grown in the South, where the tops furnish an abundance of cuttings. These are valued highly for salad or greens. The roots of Southern Prize are valuable as well as the tops, being remarkably large, symmetrical and excellent for feeding stock. A favorite for forage in the South, where it usually thrives throughout the winter without protection. Pkt., 5c; oz. 10c; ½ lb. 25c; lb., 75c, postpaid.

Rutabaga or Swede Turnip

Rutabaga or Swede Turnips are superior to any other vegetable root grown for cattle, horses and sheep. The animals thrive and fatten on Rutabagas.

SKIRVING’S PURPLE TOP—Fleshy yellow. A good keeper. Pkt., 5c; oz. 10c; ½ lb. 25c; lb., 75c, postpaid.
BERMUDA GRASS—Its great drought-resisting properties and ability to withstand our extreme Summer heat makes this the most desirable of all grasses for use in lawns in the South. With proper care it will remain velvety green during the hottest weather. The seed is somewhat slow to germinate, but, once up, grows very rapidly, and perfectly satisfactory lawns can be obtained by mid-Summer by sowing the seed in early Spring. One pound will sow a plot 50x50 feet. Per lb., 80c, postpaid; 5 lbs., $3.75, not postpaid.

ELECTRIC PARK LAWN MIXTURE—We have given much thought and made many experiments to secure the best selection, and think our Electric Park Mixture is the best possible for permanent lawns. One pound of this mixture is sufficient to sow 400 square feet. Per lb., 40c, postpaid; 10 lbs., $3.50, not postpaid.

KENTUCKY BLUE GRASS—This is the basis of all lawns where tame grasses are preferred, and in combination with White Clover forms the finest and smoothest lawns. In the South it does the best during Fall, Winter and Spring, remaining green all Winter. Especially adapted to shady situations. One pound will sow a plot 20x20 feet. Per lb., 40c, postpaid; 10 lbs., $3.50, not postpaid.

ENGLISH, or PERENNIAL RYE GRASS—is largely sown for Winter lawns on Bermuda sod. The Bermuda blades, being easily affected by frost, become red and rusty looking, while English Rye during Winter presents a most beautiful appearance, being of a vivid green, and as the Bermuda during April and May makes its appearance it overgrows the English Rye, causing the latter to decay and act as a fertilizer to the existing grass. It should be sown from September to March. One pound will sow a plot 15x15 feet. Per lb., 25c, postpaid; 5 lbs., $1.00, not postpaid.

WHITE DUTCH CLOVER—it is very hardy and its dwarf growth makes it desirable for lawns. Per lb., 75c, postpaid; 5 lbs., $3.50, not postpaid.

LAWN FERTILIZER AND LAWN LIME. Refer to page 35 for prices.
LEEE’ES DEPENDABLE GRASS SEEDS

If we in the South worked as hard endeavoring to obtain Grass crops and permanent pasture meadows as we do digging hay out of our cotton and corn, we would be financially much better off.

No country can be permanently prosperous without grass and live stock. Unfortunately we cannot grow all the grasses that are grown in some latitudes. We can grow some varieties as listed on pages 34 and 35, to good success. In the preparation of your seed beds do not overlook the fact that a liberal application of Lime or Fertilizers are as correspondingly beneficial to grasses as for corn or cotton. Neglect in using it in either case is your own loss.

LEE’S BERMUDA GRASS SEED—To the South for grazing as Kentucky Blue Grass is to the north. Will grow in any soil not too wet, bears heavy grazing and trampling with little injury and as fattening grass has few equals. Valuable for growing on lands liable to wash, its matted roots binding the soil and preventing washing better than any other known grass. For all-the-year green it should be grown mixed with Perennial Ryegrass. If grown with Burr Clover, Japan Clover or Vettrch an all-the-year grazing may be had, the clover and vetch coming on when the Bermuda is dormant. Bermuda may be killed by shallow plowing in the fall, exposing the roots so they will freeze during the winter. Sow the seed in the Spring at the rate of 3 to 5 pounds to the acre. Lee’s Bermuda Grass Seed is widely known for its dependable quality, being carefully selected as to weight and germination. Lb., 30c, postpaid; 10 lbs., $7.50, not postpaid. Write for quantity prices.

RED TOP OR HERDS GRASS is really one of the most valuable of all grasses for the South. Succeeds well on most any soil, but is especially adapted to moist situations. Considered one of the best grasses for marshes and on the spongy soils along brooks. After once being established it thickens and improves year by year.

It makes excellent pasturage and good crops of fine quality hay. We regard Red Top as the best of all tame grasses for the South. There are few farms but what have some land adapted to this grass, and you will find it a big investment to have a few acres on your farm. There is nothing better to bring up your young calves.

Can be sown either in Spring or Fall. Sow 8 to 10 pounds of fancy, cleaned seed to the acre.

LEE’S EXTRA FANCY (cleaned from chaff)—Lb., 30c, postpaid; 10 lbs., $2.50, not postpaid. Write for quantity price.

TIMOTHY—For hay Timothy is the best known and most extensively grown of all grasses. Timothy grows best on clay or heavy loam, lowlands and in loamy soil, provided there is abundant moisture. Sow 12 pounds to the acre. Lb., 20c, postpaid; 10 lbs., $1.50, not postpaid. Write for quantity price.

CANADIAN BLUEGRASS—A hardly perennial. Much of the same nature as the Kentucky Blue Grass, but being grown in the high latitude of Canada, is considered more hardy. Is valuable for either lawn or pasture purposes. Very deep green in color. Fourteen pounds to the bushel. Per lb., 35c, postpaid; 10 lbs., $3.00, not postpaid. Write for quantity prices.

PERENNIAL (or English) Ryegrass—Produces an abundance of bright green foliage throughout the season. On account of this it is used for lawns in connection with other Grasses. However, its main purpose is to furnish a nutritious permanent grass for meadow and pasture, which endures close cropping and makes a strong, quick after-growth. It prefers rich, moist soil, but will also do well on sloping banks, as its roots are very fibrous and spreading, forming a mat-like mass. The hay cut from it is very nutritious. Sow 20 pounds to the acre. Lb., 25c, postpaid; 10 lbs., $2.00, not postpaid. Write for quantity prices.

ITALIAN RYE GRASS—Yields several cuttings per year of most nutritious hay; a very valuable grass particularly adapted to rich loamy soils or low grounds. Recommended particularly for fall sowing. Sow about 15 pounds to the acre. Lb., 25c, postpaid; 10 lbs., $3.00 not postpaid.
**GRASS SEEDS Continued**

**TALL MEADOW OAT GRASS**—This grass is increasing in popularity wherever it is grown. It seems to make more leafage and grazing, a larger yield of hay, and to keep green longer, both during the winter and summer, than other grasses. It is especially desirable and adaptable to the South. It withstands the heat and drought of midsummer and cold of winter, starts very early in the spring and continues to give good grazing until late in the fall. For hay it can be cut twice in a season, frequently producing nearly double as much hay as Timothy. Its nutritive qualities are first class. Ripens at the same time as Orchard Grass, and gives the very best results soon with it and Red Clover. For hay it should be cut while in bloom or as soon after as possible. Tall Meadow Oat Grass is best adapted for good leamy uplands, but gives excellent results on nearly all soils and better results than most other grasses on light, medium or sandy soils. Now 30 pounds to the acre. 1 lb., 50c, postpaid; 10 lbs., $4.50, not postpaid. Write of quantity price.

**MEADOW FESCUE, or ENGLISH BLUE GRASS**—Is particularly well adapted to our mountainous districts, and also gives excellent results on good loamy or heavy soils and on low grounds. It is a splendid spring and summer grass, stands close grazing, and makes more and thicker leafage than even Orchard and Tall Meadow Oat Grass. The roots penetrate deeply, adapting it to poor soils and making it quite drought resistant. It is especially useful for fall and winter pasturage, as it remains green throughout the winter. It is at its best after two or three years, and although used principally in pastures, it makes a good hay, and cattle thrive on it whether green or dry. Flowers in June and July. Sow 30 pounds to the acre. 1 lb., 45c, postpaid; 10 lbs., $4.00, not postpaid. Write for quantity prices.

**Lee’s Special Grass and Clover Mixtures**

It is a well-established fact that a mixture of Grasses and Clovers will produce a larger yield than can be obtained when grown singly. Where a single grass is grown in vacant spaces will occur throughout the field these spaces in time will be occupied by weeds, whereas when a well-balanced mixture is grown the entire surface is covered.

Judging from our increased sales for these special mixtures we are lead to believe our farmers are recognizing more and more their value. Our mixtures have been carefully combined to suit special soil conditions.

**LAWN GRASS SEED REFER TO PAGE 33**

**FERTILIZERS FOR FARMS, GARDENS AND LAWSNS**

We believe we are safe in assuming that it is generally conceded that the proper use of Fertilizer is necessary to good crops. One cannot get something for nothing, there must be put back into the soil that which is taken out.

Prices named are F. O. B. Fort Smith, and subject to change. Write for quantity prices.

**STANDARD VEGETABLE FERTILIZER**—Analysis: Available Phosphoric Acid, 8 per cent; Nitrogen, 2.50 per cent; Potash, 4.00 per cent. A high grade Fertilizer prepared for use on vegetable crops of every kind. 10 lbs., 50c; 25 lbs., $1.00; 100 lbs., $3.75.

**CORN AND COTTON FERTILIZER**—Analysis: Available Phosphoric Acid, 8 per cent; Nitrogen, .02 per cent; Potash, 1.00 per cent. A high grade for corn, cotton and all crops, highly recommended by the Extension Service of the University of Arkansas. 100 lbs., $2.50.

**ACID PHOSPHATE**—Guaranteed 16 per cent available Phosphoric Acid. Acid Phosphate is recommended for all grain and grass crops, cow peas, soy or soja beans, and for applying to lands deficient in phosphoric acid. Bag, 100 lbs., $2.50.

**ODORLESS LAWN DRESSING**—Lawn Fertilizer should be applied as a top dressing, either in Spring or Fall, at the rate of 25 pounds of Fertilizer to 1,000 square feet of lawn; when seeding down a lawn for the first time, use double this quantity. Our Lawn Fertilizer is dry, very clean and odorless, and contains no weed seeds. Per 5 lbs., 40c; 10 lbs., 65c; 25 lbs., $1.25; 50 lbs., $2.25; 100 lbs., $4.00, not prepaid.

**GROUND LAWN LIMESTONE**—has a total neutralizing power in terms of Calcium Carbonate of 95.83%. This high carbonate content in your lawn, is a sweetener of the soil, a tonic. 25 lbs., 75c; 50 lbs., $1.50; 100 lbs., $2.50, not prepaid.

**PLANT FOOD**—Refer to page 73 for prices.
LEE'S RE-CLEANED CLOVER SEED

The prices given below are NET, free on cars; this city, and subject to market changes, purchasers paying all transportation charges; new seamless grain bags extra. When customers are in need of large quantities, we will be pleased to quote, on application, the lowest prices that the market will justify at the time.

Remember you are making an investment on which you expect profits for a number of years, and that the size of your profits will be in proportion to the care exercised in preparing your land before you sow the seeds.

ALFALFA OR LUCERNE

Once established it lasts for years, yields 3 to 5 cuttings each season. Contains as much protein as wheat or bran. Requires but little attention and is one of the farm's most profitable crops. Alfalfa does well on any good, well-drained loam that is deep enough to allow the deep feeding root system to penetrate. Lime is recommended at least a ton to the acre. Seed can be sown either in Fall or Spring. "Lee's Extra Fancy Seed recommended," at the rate of 15 to 20 lbs. to the acre. Do not attempt to grow Alfalfa without inoculating your seed, except on fields where it has previously been grown. Samples, purity and germination tests will be furnished to prospective buyers on request. Lee's Extra Fancy Seed (American grown), lb., 35c, postpaid; 10 lbs., $2.75, not postpaid. Write for quantity prices.

ALSIKE, or SWEDISH CLOVER—Similar in many respects to Red Clover, but well adapted to the Southern climate and can be grown as easily as Alfalfa Clover, making two or three cuttings of the finest hay each year. It is very hardy, does not winter kill and for this reason makes the best hog pastures for both Winter and Summer. It is adapted to moist soils (soils such as Red Top does its best), and when grown in bottom or rich land will produce hay almost equal to Alfalfa in quantity or quality. Particularly valuable in mixtures of grasses whether grown for hay or grazing. There should be more of this Clover sown. Sow 5 to 8 pounds per acre. Lee's Extra Fancy Seed, lb., 40c, postpaid; 10 lbs., $3.25, not postpaid. Write for quantity prices.

CRIMSON CLOVER—Most valuable crop for green manuring, soil ing hay, pasture and ensilage. It is an annual and must be sown every year. Improves worn-out and poor soils. Should be sown in your corn and cotton at the last working and you will have bigger crops next year. Sow 15 lbs. per acre. Lee's Extra Fancy Seed, lb., 25c, postpaid; 10 lbs., $2.00, not postpaid. Write for quantity prices.

MAMMOTH OR SAPLING CLOVER—It is used mostly to plow under for fertilizing. Sow 8 to 10 pounds per acre. Lb., 40c, postpaid; 10 lbs., $3.50, not postpaid.

BUDD CLOVER—An annual Clover much prized in the South for winter pasture. It is also used largely to inoculate fields intended for Alfalfa, as the same bacteria inhabit the roots of both plants. The greatest mission of Burr Clover, however, is to prolong the green period of Bermuda Grass. The use of Burr Clover is principally a soil improver and for pasture, as there is not much to be derived from cutting and curing the hay. California grown (not in the bur). Lb., 45c, postpaid; 10 lbs., $4.00, not postpaid. Southern spotted (in the bur); write for prices.

WHITE DUTCH CLOVER—Largely used in lawn and pasture mixtures. Makes a small close compact growth covering the ground like a carpet. Grows well through the south and can be planted any time. Alone it requires 4 to 6 pounds. Lee's Extra Fancy Seed, lb., 75c, postpaid; 10 lbs., $7.00, not postpaid.

RED CLOVER—Standard Clover for all purposes, makes superior hay, especially if mixed with Timothy. It however succeeds best in lime stone soils, as in the northern part of our state where it is used extensively. Sow 8 to 12 pounds to the acre. Lee's Extra Fancy Seed, lb., 40c, postpaid; 10 lbs., $3.50, not postpaid. Write for quantity price.

FOR YOUR PROTECTION

We maintain a thoroughly equipped seed laboratory for the proper testing of all the seeds we send out.

Inoculating Cultures for leguminous crops fully described on pages 65. They increase your crops and improve your soil.
PLANT LEE’S SEEDS FOR BEST RESULTS

Japan Clover (Lespedeza)

This legume should be more largely grown than it is, being particularly well adapted to worn-out soils, as it is very tenacious and grows well under the most adverse conditions and lasts always.

Once started, it soon spreads and takes possession of the land, making a steady growth of the finest and most nutritious pasturage, greatly relished by horses and all farm stock. It succeeds everywhere throughout the Southern and Middle States, taking possession even of stony hillsides and barren or waste lands. It also does well on low or wet lands, in combination with Red Top, furnishing excellent grazing.

Excellent results may also be obtained from grazing when sown in connection with Red Top, Sweet Clover and Hairy Vetch.

Lespedeza is an annual, perpetuating itself by an abundance of seed, which mature late in the Fall and sprout as soon as Spring begins, growing slowly till July, when it grows rapidly to a height of 12 to 24 inches, according to the soil. For seed, it should be cut from October to November. It will afford a cutting the first year and reseed itself. Lespedeza is the cheapest restorer of worn-out lands. Sow 12 to 15 pounds per acre. (25 lbs. to bus.) Lb., 40c, postpaid; not postpaid, 10 lbs., $3.50. Write for quantity prices.

Sow Your Seeds by Machinery

An even distribution of broadcasted seeds means a uniform stand—you cannot get it by hand sowing, but you can with a CAHOON or a CYCLONE Seed Sower. See page 59.

Use Quotation Sheet, Page 64.

Sweet Clover, White Blossom

A variety that resembles Alfalfa, both as to appearance and habit of growth when young. It grows much larger than Alfalfa—often 4 to 6 feet high. Is valuable in the bringing up of old, waste and worn out soils, and thrives well even on extremely poor soil. If plowed under it adds humus and nitrogen to the soil, or if simply left to grow up and drop back for a few years the decaying stalks and roots will do wonders for the land.

The deep roots break up, aerate and drain stiff subsoils and add humus. Its feeding value is high, about equal to Alfalfa. Valuable as a pasture and in spite of its bitter taste, stock soon learn to like it.

Its greatest value other than a fertilizer is in preparing the soil for Alfalfa, as the bacteria of Sweet Clover is the same as that of Alfalfa. Be sure to inoculate your seed as noted on page 65. Sow early in Spring or Fall at the rate of 15 to 25 lbs. per acre. Lee’s Extra Fancy Seed, lb., 30c, postpaid; 10 lbs., $2.50, not postpaid. Write for quantity prices.
LEE'S PURE BRED FIELD CORN

Prices on Seed Corn are based on customers paying freight and express charges.

Investigations by United States Government and through other mediums have conclusively proven that where the leguminous crops are planted with corn it gives a better growth, and more corn. Under the head leguminous crops would come Soy Beans, Velvet Beans, Cow Peas, etc. These crops put into the soil the nitrogen which the corn takes out, leaves the ground in much better condition and in addition to increasing the yield of corn, will furnish a large amount of forage for stock after the corn has been gathered.

The seed of these crops are usually planted in the same hill with corn, or alternate hills or alternate rows, depending on the proportions wanted in feed.

Corn listed on this page are the early maturing varieties. The seed is Northern Grown, carefully selected and hand picked. Samples on request.

**IOWA SILVER MINE—(90 days.)** More widely and favorably known than any other white Corn. On very rich land Silver Mine will make enormous yields, and on thin land it seems to adapt itself to hard conditions. Is deep-grained, pure white, rough topped with a small white cob. Ears run from 9 to 12 inches long, with 16 to 20 rows. This Corn is a drought resister, maturing in hot climates where early droughts are frequent. Stalks medium height, very leafy, with broad blades. Pk., $1.00; bu., $3.00, bags included.

**CHAMPION WHITE PEARL—(90 days.)** An early pure white Dent variety, maturing about ten days earlier than the Iowa Silver Mine. It is the most productive of any of the extra early varieties. The grains are extra deep and wide. The cob is white, medium size, and pure white, heavy and long, with the rows set close together. Under favorable conditions it probably will not produce as heavily as the Iowa Silver Mine, but its earliness makes it a very desirable Corn. Pk., $1.00; bu., $3.00, bags included.

**WISCONSIN WHITE DENT—(90 days.)** First introduced by us 7 years ago. It is 16 to 20-rowed, deep grained, medium sized ear, with a small cob. Will withstand a great amount of dry weather and makes a crop when most other varieties fail. Pk., $1.00; bu., $3.00, bags included.

**IOWA GOLD MINE CORN—(90 days).** A splendid yellow Dent variety. This Corn is identical in appearance and habit of growth and in size of ear, earliness and in productiveness with the Iowa Silver Mine. Color a bright golden yellow. Grain is very deep, cob small. The kernels are deep wedge shape. Pk., $1.00; bu., $3.00, bags included.

**IMPROVED LEAMING—(90 days.)** One of the best of the heavy yielding Yellow Dent Corns which seems especially adapted to this climate. Does not make a large growth of either stalk or fodder, all the vigor of the plant going to make corn, making generally two big ears to the stalk. It does well on all soils, but prefers light to medium soils. The grain is wedge-shaped and covers the entire cob. Pk., $1.00; bu., $3.00, bags included.

**LEGAL TENDER—(90 days.)** Pure yellow color; large, long ears, with deep grains on a very small cob. Introduced by us twelve years ago, and has now become one of the standard varieties of yellow Corn. We recommend it as one of the very best of the yellow Corns. It does well on light land, and especially so on heavy land. Pk., $1.00; bu., $3.00, bags included.

**PLANT PLENTY OF MONEY SAVING CROPS**

MARKETS CHANGE—Write for quantity prices when ready to buy Field Seeds in larger quantities than quoted in this Catalogue, using quotation sheet, page 64.
Lee's Thoroughbred Field Corn—Continued

Prices on Seed Corn are based on customers paying freight and express charges.

Lee's Improved St. Charles White—110 Days

First introduced by us in 1912. It gained popularity from the first and is now considered to be the Best Heavy Land White Corn. It has made yields not exceeded by any other variety. From many sections customers reporting as high as 80 to 85 bushels to the acre. While not recommended for thin land, we believe it to be the best Corn for a general crop on bottom or heavy upland. Grains white, deep, soft, and set on long red cob. Ears remarkably large. The best of its class yet introduced by us. The corn we offer is Arkansas grown and is of the highest possible quality. Pk., $1.15; bu., $3.50, bags included. Write for samples.

STRAWBERRY—A splendid old variety considered by many to be superior to any for feed; very productive, large ears of good appearance. The strain we offer is selected with great care and is sure to give best results. Pk., $1.15; bu., $3.50, bags included.

BLOODY BUTCHER—A most beautiful, large-grained red Corn. It is an enormous yieder of large, handsome ears, measuring from 10 to 12 inches long and containing from fifteen to twenty rows of splendid, deep grains. Pk., $1.15; bu., $3.50, bags included.

HICKORY KING—This has the largest grains with the smallest cob of any white Corn. So large are the grains and so small the cob that an ear broken in half a single grain will almost cover the cob section. Of strong growth, the stalks take a firm hold in the ground and stand upright. It yields splendid crops on light soil. Pk., $1.25; bu., $4.00, bags included.

We can recall very well when the planting of June Corn was somewhat of an experiment and was planted only in a limited way, but of late years we have had a very large sale of this variety of Corn. Very seldom it misses making a crop, which in itself is valuable, but large returns are frequently received when sold for roasting ears, being especially adapted for this purpose. We feel very proud of the fact that we were one of the first to introduce the Original seed from Mexico. You can depend on our stock being of the very best type of this Corn. We do not advise (if grain is wanted) planting before June 1st.

LEE'S IMPROVED JUNE CORN—(White Kernel.) A dwarf June Corn growing 6 to 8 feet. Has medium size ears and matures in about 110 days. Should be planted during June; however, splendid yields have been reported from plantings as late as July 10th to 15th. A true drought-resisting June Corn that has gained wide popularity with our trade. Especially suited for planting on oat, wheat or potato land after the crops have been removed. Pk., $1.25; bu., $4.00, bags included.

LEE'S BLUE AND WHITE JUNE CORN—This is a true dry weather Corn. Equally good for early or late plantings. Produces large crops under most adverse conditions. The seed stock of this variety has been very short the past few years. We are pleased to offer a limited quantity to our customers this season. Pk., $1.25; bu., $4.00, bags included.
Lee’s Dependable Cotton Seed

For a number of years we have been working towards the growing of Semi-long Staple Cotton. It has been found that certain varieties can be grown successfully in Arkansas and Oklahoma. The experimental day has passed and the coming year will find a large percentage of our Cotton planters growing Semi-Long Staple Cotton almost exclusively. It must be remembered, however, that it requires good land to produce a paying crop of this cotton. On moderately good upland, we would recommend the Rowden Big Boll or Mebane Triumph varieties.

**ACALA SEMI-LONG STAPLE**

*Description*: Plant of medium height, with strong, erect main stem. Wood limbs or primary branches few, erect or ascending. Fruiting branches short jointed, zigzag, the lower branches long, becoming very short above, giving the plant a semicircular appearance. Leaves of medium size. Bolls medium size—1 1/4 inches or larger—ovate or ovate-oblong with a rather short blunt point; 50 to 60 to the pound. Involucral bracts rather small for an American variety, rarely reaching more than half the length of the mature bolls; teeth long and narrow and somewhat acutely shaped, often interlacing over the buds. Pedicels of medium length—1 1/4 inches—and often pendent, of medium thickness, stormproof, opening wide. Lint 1 1/4 to 1 3/4 inches, usually 1 1/2 full, with good drag and extra strong; clear white with creamy tint. Percentage of lint 32 to 35.

In the shape of the plant the type of boll and especially in the quality of the lint, Acala is distinct from all other varieties. It meets a distinct agricultural need in maturing somewhat earlier than Lone Star or other big-boll Cottons. We regard Acala as one of the best of the Semi-Long Staple varieties. The original stock was obtained by the United States Department of Agriculture in Southern Mexico in 1906. The preliminary work of acclimatizing and selecting desirable strains was carried on in Southern Texas between 1907 and 1911. The present strain, adapted to Northern conditions, is from the original field. Probably the largest single acreage (1100 acres) of Acala Cotton in the Northern Cotton Belt, was grown on the breeding farms of Mr. Jas. M. Littlefield at Brant, Oklahoma, (near Fort Smith), which Cotton Seed we offer. This seed has been grown with the greatest of care, ginned by special machinery, exclusively used, owned and operated by Mr. Littlefield on his farm for the ginning of this seed. Sack ed in 2 and 3 bushel sacks bearing Mr. Littlefield’s imprint thereon, together with a tag giving the germination and date of the last test. The fact that Mr. Littlefield found ready sale at an advanced price of 3 to 5 cents per lb. for his entire 1920 crop and having already received inquiries from the representative of the Eastern spinners regarding his crop for 1921, should be sufficient reason for planting a Cotton which will not only command a higher price than the ordinary short staple Cotton, but will find a ready sale. We have visited Mr. Littlefield’s farms, noted carefully the method in which he selects his seed, and recommend it as being first quality and dependable in every respect.

**ACALA SEMI-LONG STAPLE**—We have secured the exclusive sale of this seed and shall be pleased to book orders for your requirements for present or later shipments. Per bu. (32 lbs.), $3.50 by express or freight at purchaser’s expense.

**ROWDEN BIG BOLL**—A splendid well known variety which seems to adapt itself to almost every kind of soil. Recommended as one of the best varieties for upland planting. The Seed we offer was grown under the same conditions and given the same care as Acala Seed, described on this page. Put up in 2 and 3-bushel bags. Per bu. (32 lbs.), $2.50, F. O. B. Fort Smith.

**MEBANE TRIUMPH**—We offer excellent Seed of this variety. Per bu. (32 lbs.), $2.50, F. O. B. Fort Smith.
LEE’S RE-CLEANED FIELD SEED

NOTICE
Owing to the fact that our Catalogue goes to press at an early date, we cannot make prices on many varieties of Field Seeds, but will do so on receipt of your requirements. For this purpose use Lee’s Special Quotation Sheet, page 64.

Lee’s Choice Seed Oats

From 1½ to 2 bushels to plant an acre.

RED RUST PROOF OATS—The standard Oat for the South for Spring planting. They seem especially adapted to our climate and not inclined to rust as other varieties of Oats. The stock we offer is re-cleaned, free from dirt and chaff and should not be compared to the commercial Oat offered to the trade as Seed Oats, but usually of very inferior quality. A more careful selection of your Seed Oats will bring you greater returns. All the Seed Oats we offer are thoroughly tested in our laboratory and we are pleased at any time to mail samples and advise purity and germination test on application. Bu., $1.25; 5 bus., $5.50. Write for quantity prices.

EARLY BURT, or NINTY-DAY OATS—Very early in maturing, being ready to cut in about 90 days from spring planting. Grows well on thin or rich land. Makes a good growth of straw, is an abundant yielder of bright, clean heavy grain, is usually free from rust and, what is of equal importance when plantings are late, it is of early maturity. While this variety is of recent introduction, has proven very satisfactory and is in much demand. Lee’s Choice Re-cleaned Seed. Bu., $1.25; 5 bus., $5.50.

WINTER TURF OATS—Especially valuable for the superior grazing which they afford during the Winter and Spring months. Refer to our 1921 Fall catalogue for full description and prices.

Lee’s Tennessee Golden Millet

An improved tall growing, large headed variety, growing under favorable conditions four to five feet and producing immense quantities of the finest quality of hay. Introduced by us some 18 years ago, it is now recognized the best of its class and planted extensively where known. Millet is exhaustive to the land only if allowed to stand until the seeds form, but Millet should be cut when coming into flower to produce the best hay. As a summer catch crop it has few equals, for it makes its crop in about 60 days. To obtain the finest Millet hay, sow thickly, not less than a bushel to the acre. We recommend the sowing of only Lee’s Tennessee Golden Millet. Western Millet does not do so well and you will be disappointed in the crop. Sow one bushel to the acre. Write for prices.

WHITE WONDER MILLET—This Millet is shaped and has the characteristic of the Tennessee Golden Millet, but is whiter in color and probably a little larger berry. The farmers, where it is produced, consider it an excellent type of Millet, and claim it to be a heavy yielder. Write for prices.

FANCY KANSAS—Height 2 to 3 feet. Under favorable conditions it yields a good crop of hay, but for the additional cost we recommend the use of LEE’S TENNESSEE GOLDEN or WHITE WONDER MILLET. Write for prices.

For Prices on Seed Sowers refer to page 59.
Lee's Sudan Grass Seed
A Wonderful Dry Weather Crop.

Considering its remarkable feeding qualities, quick growth and ability to withstand hot winds and droughts, Sudan Grass is the greatest of all forage and hay crops. It is very closely related to the Sorghum family and is easily grown, easy to harvest and easy to cure. Its greatest value is for hay, well liked by stock, the entire plant, leaves, stems and heads are eaten. In feeding value it is equal to Timothy. Four tons to the acre is not an exceptional yield and even more where the season allows four cuttings. Cut when in bloom, for at that stage the feeding value is the highest. Sow after the ground becomes warm, with a grain drill at the rate of 5 to 8 pounds to the acre, in rows 2 feet apart and cultivate like corn. When sown broadcast sow at the rate of 15 pounds per acre. Grown broadcast the hay is finer and rather better than when grown in rows. Almost any soil will grow Sudan Grass and being a drought resister it solves the hay problem and the farmer who does not have an acreage of “Sudan” is missing a golden opportunity. The seed we offer is carefully selected, re-cleaned, Kansas grown seed. Lb., 25c, postpaid. Not postpaid, 10 lbs., $1.50. Write for quantity prices.

Buckwheat

Buckwheat is the poor land crop, preferring light soil, but grows well on nearly all soils that are not too rich. Grown quite extensively for Bees, as they feed on the bloom, giving an increased production of honey. Sow 1 bushel to the acre, either broadcast or in grain drills.

SILVER HULL—Grains light gray. A prolific and favorite sort. Gal., 75c; pk., $1.35; not prepaid. Write for quantity prices.

JAPANESE—Grain brown. Ripens a week earlier than the Silver Hull and has a larger kernel. Gal., 75c; pk., $1.35, not prepaid. Write for quantity price.

Forage and Fodder Crops

Sudan Grass.

Barley (48 Lbs. to Bu.)

Makes more leafy growth than Rye, Wheat or Oats. Makes quick growing crops of most excellent and nutritious green pasture. Unless intended for seed it should be cut before fully ripe.

BEARDLESS—Grows about as high as common Barley, but has a stiffer straw, which enables it to stand up well. Market price.

BEARDED SPRING—Makes excellent grazing. Gal., 40c; pk., 70c; bu., $2.25, not prepaid.

Speltz, or Emmer

(40 Pounds to Bushel)

A valuable grain, somewhat like wheat. It is adapted to dry sections and poor soils, often yielding 50 bushels or more grain per acre. The straw of Speltz, of which there is several tons per acre, has great feeding value, and is relished by all kinds of stock. It is sown at the rate of 50 pounds per acre. Gal. 40c; pk., 70c; bu. (40 lbs.), $2.50, not postpaid.

Write for Delivered Prices

Field Seeds are sold on market prices, subject to daily changes. Write us for delivered prices when ready to buy.
Soy Beans
Superior to Red Clover and Cow-Peas and equal to Alfalfa for milk and butter production. When planted with corn supplies as much nitrogen as the corn takes from the soil and increases the yield greatly. Planters who have no land adapted to Alfalfa Clover should not overlook Soy Beans. Can be grown with the following crops to good advantage, giving a better balanced ration. Cow Peas, the beans supporting the pea vines. Plant this combination: 1/2 bu. Soy Beans to 1 bu. Cow-Peas. Sudan Grass and Soy Beans will give a better balanced feed than Sudan Grass alone, as its protein content is low, while that of Soy Beans is high. Corn and Soy Beans also make an excellent combination.

Inoculate—If planted where Soy Beans have not been grown before, be sure to inoculate the seeds with Soy Bean bacteria. See page 65.

May be planted either broadcast or in drills. Usually a better crop is had where planted in drills and cultivated. Plant 1 to 1 1/2 bu. broadcast or 15 lbs., in drills to the acre. Mammoth Yellow-Black or Brown. Market price.

VELVET BEANS are grown largely for the re-claiming of poor and worn out lands. Will grow on any kind of land making more growth and pods and adds more vegetable matter to the soil than any other known plant. In the planting of Velvet Beans you are not only restoring your land but doing so at a profit in the way of grazing for stock during the Winter months. Sow at the rate of 1 bushel (60 lbs.) broadcast to the acre. Early Speckled is probably the best for this latitude. Market price.

COW PEAS
Too widely known to require description. Especially valuable for building up worn out soils in the South. We handle large quantities of Whippoorwills, Blackeyes, Clays, etc., in season. Market price.

Sow Your Seeds by Machinery, Means a Uniform Stand. Refer to page 59.

RYE, "The Greatest Winter Cover Crop."

The planting of winter cover crops is badly neglected by the Southern farmer. By this means you can not only improve your land for next season’s seeding, but at the same time obtain a wealth of good grazing for your stock throughout the winter months. There is not a foot of land that is available which should not have some cover crop planted thereon. Rye is one of the most used grains for winter cover crop and one of the best. It not only affords good winter pasture but if stock are taken off later in the spring there can be a paying crop of seed harvested, which seed always commands a ready sale for seeding purposes. One of the chief recommendations for Rye is the fact that it will not winter kill.

In the Fall we handle large quantity of seed Rye, prices on which will be quoted in our Fall Catalogue.
FORAGE AND FODDER CROPS

The prices given below, except when otherwise noted, are based on customers paying all transportation charges.

A Field of Rape Grown at the County Farm, Fort Smith

This field of Rape (2 acres) was planted in August and pigs turned on it in September.

Rape is in a class of its own. A quick-growing economical green forage for sheep, hogs, cattle and poultry. There is nothing that equals it. It has been estimated to yield more than ten tons of green forage per acre that for fattening is claimed to be worth pound for pound double the value of clover. Sow in early spring for early grazing. Mid summer for fall and winter grazing. In fact you can sow it nearly all-year-round. The plant resembles Kale or Mustard but grows much larger. In grown especially for its leaves, grows to its greatest perfection in cool weather and for this reason is adapted to the South as it furnishes the best of green forage throughout the Winter months.

Do not turn stock into Rape pasture when they are hungry, or when it is wet. Allow them to remain a short while the first day and increase the time each succeeding day. Sow at the rate of 3 pounds per acre in drills or 5 to 6 pounds per acre broadcast. Lb., 25c, postpaid; not postpaid, 10 lbs., $1.30; 100 lbs., $11.00.

HAIRY, or WINTER VETCH—This is a very valuable forage plant. It is an annual, but resows itself, and will come up year after year on the same ground. It succeeds well on nearly all soils and thrives surprisingly on poor, light land, and will endure extremes of drought, heat and cold. It belongs to the Pea family, but the vines are much longer and the foliage is more abundant. When sown in August or September it covers the ground before frost and prevents leaching of the soil during the Winter and Spring. When sown in April or May it can be cut in July, the second growth affording an excellent pasture during the summer. 30 to 40 lbs. of seed required to the acre. Inoculate your seed; see page 65. Lb., 40c, postpaid; not postpaid, 10 lbs., $3.00; 100 lbs., $25.00.

PEANUTS

For medium, light, loamy or sandy land, Peanuts are one of the most profitable crops that can be grown. In addition to the yield of nuts, they yield quite largely of nutritious forage, and will make ordinarily about a ton of excellent dry forage per acre, in addition to the crop.

Culture—Shell the nuts and plant in April or May in drills 2½ to 3 feet apart, dropping them 8 to 10 inches apart in the drill. Work occasionally, cultivating flat and keeping the land clean of weeds.

IMPROVED LARGE VIRGINIA—A very profitable variety to grow, and is easily cultivated; very erect; largest pods and kernels with fewer imperfect pods than any other variety. The vines make valuable forage for stock. Market price.

SPANISH—An early small-sized variety which is enormously prolific, and the kernels are very rich and fine flavored. It is also very largely grown for stock-feeding, the vines and roots making excellent nutritious hay or very fattening for hogs. Market price.

TENNESSEE RED—Best of all varieties, splendidly adapted to Southern soils, both black and sandy; 3 to 4 large nuts in each pod, very prolific. Market price.
FORAGE AND FODDER CROPS

Prices subject to market changes. Write for prices when ready to buy.

CAVE SEED FOR FODDER

EARLY AMBER—For Fodder. One of the earliest types in cultivation. Black hulled. Grown almost exclusively for forage crop alone, or broadcasted with Peas. (Bu. 50 lbs.) Per lb., 15c, postpaid; 10 lbs., $1.00, not postpaid.

EARLY ORANGE—For Fodder. Larger than Amber and about ten days later. On account of its heavy stalk is preferred by many to the Amber for hay. Lb., 15c, postpaid; 10 lbs., $1.00, not postpaid.

KAFFIR CORN—The Great Dry Weather Corn. Red or White-Seeded. This Non-Saccharine Cane is one of the best for forage plants. It is a great grain-producer, and is greedily eaten by all domestic animals, whether fed in the grain or ground and cooked. For grain, sow at the rate of 5 to 7 pounds per acre and cultivate same as Corn. For hay, sow in drills or broadcast at the rate of 50 to 75 pounds per acre, and cut when seed is coming to dough stage; makes a very valuable hay, of good quality. Lb., 15c, postpaid; 10 lbs., $1.00, not postpaid.

MILK MAIZE—Yellow. This wonderful fodder plant has done much for Southern farmers, withstanding drought as no other forage plant will, so much that it will produce two crops most any year, however droughty, and is a splendid feed for all kinds of stock, heads and fodder both being used. It is enormously productive. Ten pounds will plant an acre; plant in rows and thin out same as Corn. Lb., 15c, postpaid; 10 lbs., $1.00, not postpaid.

FETERITA—A Non-saccharine Cane. A new forage crop for the South. Similar to Kaffir Corn in general habit, but grows a little taller and produces larger heads, standing erect, white seed and early maturity. Its greatest value, however, is its great ability to resist drought. Makes a splendid crop of both grain and forage. Lb., 15c, postpaid; 10 lbs., $1.00, not postpaid.

Lee’s Cane Seed—For Syrup

We are pleased to offer to our customers this season a limited quantity of very choice seed, obtained from one of our largest growers. The seed was grown strictly for seeding purposes and carefully selected by hand. This is a good opportunity to renew your seed stock.

We are located in one of the most favorable sections for the production of Sugar Cane. We have located at Fort Smith the largest sorghum factory in the United States. There is no vegetable or fruit that can be used in so many ways, or produced so cheaply as Sorghum Syrup. A few years ago one of our planters supplied his tenants with seed and manufactured their product into Syrup free, for the reason that it was claimed that the credit account was nearly half reduced when they were liberally supplied with Syrup. From a household viewpoint it is one of our most paying crops.

JAPANESE SPRANGLED TOP, or HONEY—It matures in 150 to 170 days. The growth is very tall with many joints to the stalk, and necessarily a more vigorous root system is developed to carry such a tall stalk, which produces a large quantity of sorghum syrup to the acre, for the reason that the tonnage production is greater than that of any other variety. The seeding quality of this cane is not very good, the heads being small and the number of seeds to the head being very much less than any other variety, and the development of the seed-head depends much on the season whether they will be fully filled up or not. The seeds are of a yellowish cast, incased in bright red glumes. This is a favorite cane where sorghum production is strived at, only, and where the growing season is sufficiently long to mature it. Lb., 50c; 5 lbs., $2.25; 10 lbs., $4.00. postpaid.

RED “N”—Matures in 120 to 130 days, producing a slightly heavier tonnage than an earlier maturing variety, and a sorghum of exceptional sweetness. The stalk grows tall and sturdy, tapering in the proper proportion from the butt to seed-head. The seed-heads are compact, bearing small, bright red seeds in great profusion. The up-right growth of this cane, and ability to withstand winds is to be greatly recommended. Lb., 50c; 5 lbs., $2.25; 10 lbs., $4.00. postpaid.
A DESCRIPTIVE LIST OF
CHOICE FLOWER SEEDS

BRIEF HINTS ON SOWING—The finer seeds should be started in shallow, well-drained boxes in the house and the young seedlings should be transplanted a few times until they are large enough to be set out into the open ground. Do not plant any seed while the ground is wet. A mellow loam enriched with compost of rotted manure and leaf-mould is the best adapted to most flowers. Take the surface smooth and fine as possible, elevating the surface of the beds and borders slightly in the middle, so that surplus water may run off.

ANNUALS are those flowers that attain their full growth, bloom and die the first year.

BIENNIALS, produced from seed, generally flower the second year and then die, the life of the plant being two seasons.

PERENNIALS usually do not flower the first year but live over until the second season and then die. They continue to bloom for many years after. These sorts constitute the "Hardy Flowers," such as Hollyhocks, Sweet William, etc.

AGERATUM

MEXICANT—Lavender-blue; 2 feet ........................................ Pkt., 5c
TOM THUMB—(Blue) Grows 9 inches ...................................... Pkt., 5c
MIXED .................................................................................. Pkt., 5c

ALYSSUM
SWEET—A very hardy annual for borders, edgings or massing in small beds, of easiest culture, producing fragrant white flowers. Pkt., 5c; oz., 20c.

LITTLE GEM—The plants grow from 3 to 4 inches high, and are covered with handsome spikes of fragrant white flowers from Spring until Fall. Fine for borders and design bedding. Pkt., 5c; oz., 30c.

AMARANTHUS
The plants grow from 2 to 4 feet high, have attractively-colored foliage and curiously-formed flower racemes. Half-hardy annual.

CAUDATUS—(Love-Lies Bleeding) Blood-red, drooping; 3 feet. Pkt., 5c
TRICOLOR—(Joseph's Coat.) Leaves red, yellow and green, 3 feet. Pkt., 5c

AMELOPSIS VEITCHII or Boston Ivy
A hardy climber, with pretty, dark-green leaves which change to bright scarlet in Fall. Will cling to the smoothest wall; requires no wire or string. Pkt., 10c.

ARCTOTIS GRANDIS
(African Daisy)
Bushy, branching plant, growing about 2 feet high. Half-hardy annual. Pkt., 5c.

AQUILEGIA (Columbine)
Blooms very early in the season. Grows 2 to 3 feet in height. Hardy perennial.

CHOICE DOUBLE—(Mixed.) Beautiful and varied colors. Pkt., 5c.

ASTERS
(Lees Special Mixtures)
The Aster is one of the most beautiful and satisfactory flowers we list, commencing to bloom in July and continuing until after frost. Are especially adapted for cut flowers. In appearance they somewhat resemble the Chrysanthemums, with all their beauty and large range of color. We have included in our list mixtures of the most beautiful, striking and distinct colors of the best varieties suitable for cut flower purposes.

TRUFFAUT'S PEONY FLOWERED PERFECTION—One of the best; flowers large and double. Mixed Colors. Pkt., 10c.

VICTORIA—An early strain, flowers large, showy and perf-ectly double. Grows about 18 inches in height. An old favorite variety and one of the best.

LEE'S SPECIAL MIXTURE ....................................................... Pkt., 10c

GIANT COMET—We consider this one of the most desirable of the mid-season varieties. A very beautiful and distinct class representing very much the Japanese Chrysanthemum, with long curls and twisted petals, formed into loose half gloved shape. The plants are of a branching habit and very vigorous in growth.

GIANT COMET—(Separate colors.) In Pink, Crimson, Lavender Rose and White .............................................................. Pkt., 10c

GIANT COMET, LEE'S SPECIAL MIXTURE ................................... Pkt., 10c

Asters—(Tall varieties.) Mixed .............................................. Oz., 5c; pkt., 5c
Asters—(Dwarf varieties.) Mixed ......................................... Oz., 5c; pkt., 5c

ANTIRRHINUM (Snapdragon)
A border plant having dark, glossy leaves, and curiously shaped, showy colored flowers with spotted throats. Though perennial, they blossom the first year. If seed is sown early, Slightly covered with leaves, they withstand our Winters. 11 to 2 feet.
Tall Mixed, contains many brilliant colors ................................. 1 oz., 25c; pkt., 5c
Tall Scarlet, Tall Pink, Tall White ................................................. Pkt., 10c

All Flower Seeds sent Postpaid on receipt of price.
ESCHSCHOLTZIA (California Poppies)—Most attrative annuals of the easiest culture. They are splendid for bedding, massing or ribbon-work. The plants grow bushy and about 1 foot high. They are favorites everywhere.

Finest Double Mixed, Pkt., 10c; oz., 50c.

Finest Single Mixed, Pkt., 5c; oz., 35c.

ANEMONE (Windflower)

RUNNER BEAN

SCARLET RUNNER—An exceedingly rapid grower. Its strong vines are always clothed with deep scarlet flowers from early Summer until Fall. Pkt., 5c; oz., 25c.

BALSAM (Lady Slipper)

An old favorite garden annual. It is of the easiest culture, producing masses of beautiful, brilliant colored double flowers; 18 inches high. Double or Camellia Flowered—Puro White—Pkt., 10c Double or Camellia Flowered—Dark Red—Pkt., 10c Double or Camellia Flowered—Finest mixed colors

BALSAM APPLE AND PEAR

Very curious vine with ornamental foliage. Its large golden-yellow fruit opens when ripe and shows its brilliant blood-red inside. Hardy annuals, 10 feet. Balsam Apple or Pear. Pkt., 5c; oz., 25c.

BACHELOR BUTTON

Also known as Centaurea, Cornflower, Blue Bottle, Ragged Sailor, Sweet Sultan, etc. These are among the most attractive of all hardy annuals and one of the most popular of all old-fashioned flowers. Mixed, all varieties. Pkt., 5c; oz., 25c.

CANTERBURY BELL

CAMPANULA CALYCANTHUMA—(Cup and Saucer). Produces beautiful single flowers 3 inches in length, with saucers 3 to 4 inches in diameter. A hardy biennial 2½ feet high, flowering the second season from seed.

Mixed—Double, all colors

Mixed—Single, all colors

CANDYTUFT

Widely known and cultivated. Considered indispensable for cutting. Valuable for bedding and borders. Hardy annual. 1 foot.

White

Mixed, contains many shades

COCKSCOMB

The comb varieties of Celosia are very showy either in the garden or grown in pots. They like rich soil.

Dwarf Cockscob—Mixed

Pkt., 5c; 1 oz., 25c

CALENDULA (Pot Marigold)

Hardy annuals that thrive anywhere. 18 inches.

Mixed—All the double sorts

CANNAS (Indian Shot)

These very attractive Summer bedding plants can be grown readily from seed. The seed is extremely hard and should be soaked in warm water until swollen. Sow singly in small pots of sandy soil and set in a warm place, preferably in a hot-bed or sunny window. Set out in June where they are to flower.

Lance Flowering—All colors and shades

BALOON VINE (Love in a Puff)

Rapid growing, pretty annual climber. Produces white flowers followed by seed vessels that look like small balloons; makes a fine porch screen; 10 feet. Pkt., 5c.

COLEUS (Foliage Plants)

The most largely used, perhaps, of all bedding plants. These are easily grown from seed.

Mixed Colors—Tall growing plants of many bright colors

Pkt., 10c

COSMOS

The strong robust plants grow 4 to 5 feet high, and produce an abundance of lovely single flowers late in the Fall, when other flowers are scarce. To stimulate the bushy growth, pinch out the tops when the plants are about 3 feet high.

Early Flowering Mixed—All colors

Pkt., 5c; oz., 35c.

CALLIOPSIS (Also Called Coreopsis)

Showy, beautiful, free-blooming plants, producing large, bright flowers of rich and charming colors throughout the entire Summer. Mainly hardy annuals; 1 to 2 feet; best mixed. Pkt., 5c; oz., 25c.

CANYON BIRD FLOWER

A rapid-growing climber, with graceful foliage of a delicate shade of green. Flowers bright yellow, which have a fanciful resemblance to a canary bird with expanded wings. Pkt., 5c.
Large Flowering Carnation

Highly esteemed favorites. Flowers of delicious fragrance and rich colors. They are equally well adapted to garden culture or to growing in pots in the house.

Red .................................................. Pkt., 10c
White .................................................. Pkt., 10c

MARGHERITE FINEST MIXED—The plants of this wonderfully fine strain may be made to bloom in four months. Flowers large, double, deeply fringed, very fragrant and appear in very attractive shades of color. Especially desirable for bedding as an annual and for cutting. Oz., $1.20; Pkt., 10c.

CYCLAMEN (Giant Flowered)

Charming plants with beautiful foliage and rich-colored, fragrant flowers. Mixed colors. Pkt. of 15 seeds, 25c.

Clematis

A climbing shrub, admirably adapted for covering stumps, arbors or rock-work. Pkt., 10c.

Cypress Vine

One of the most popular Vines with their delicate fern-like foliage and mass of beautiful star-shaped flow- flowers.
Scarlet .................................................. Oz., 25c; Pkt., 5c
Mixed, all colors ..................................... Oz., 25c; Pkt., 5c

COBAEA SCANDENS (Cathedral Bells)

One of the handsomest and most rapid-growing of the annual climbers. Climbs 30 feet in a season. The flowers are bell-shaped.
White .................................................. Pkt., 10c
Blue .................................................... Pkt., 10c
Mixed .................................................. Pkt., 5c

Gaillardia

BLANKET FLOWER—Remarkable for the profusion, size and brilliancy of their flowers, continuing in bloom from early Summer until November. Excellent for borders or for cutting.
All Annual Varieties—Mixed. Pkt., 5c.

For Dahlia Roots see page 55.

Dahlia

These grand flowers of the Autumn, if the seed is sown quite early in Spring, will commence to bloom by mid-Summer. Dig the tubers in Fall and keep in sand in cellar, 3 to 6 feet.

FINEST DOUBLE MIXED—Flowers including shades of Red, Pink, Dark Maroon, Yellow, White, etc. Pkt., 10c.

DIGITALIS (Foxglove)

The Foxgloves are quite stately and highly ornamental plants when well grown, with flower stems at least 3 feet in height. They are fine for the mixed border, or planted singly in half-shady places near a walk or drive. The racemes of flowers are often 2 feet in length, containing scores of the prettily spotted thimble-shaped flowers. Perfectly hardy. Sow seed in spring in the garden and transplant as desired. Perennial. Mixed varieties. Pkt., 5c.

DOUBLE DAISY (Bellis Perennis)

Charming plants, indispensable for cool, shady places, though they do quite well in open sunshine. Seed sown early will give blooming plants in a short time. With protection, Daisies will endure our Winter and bloom in early Spring. 6 inches.

Giant .................................................. Pkt., 10c
Double Mixed ........................................ Pkt., 10c

Datura (Trumpet Flower)

Bushy, branching, annual plants, 2 to 3 feet high. Suitable for backgrounds. Mixed. Pkt., 5c.

Forget-me-not (Myosotis)

Half-hardy perennial, which flowers the first year from seed if sown early.

Blue .................................................. Pkt., 5c
White .................................................. Pkt., 5c
Mixed Colors ........................................ Pkt., 5c

Four O’clock

A brilliant and showy plant of compact growth with rich, glossy leaves and profusion of blooms during the entire afternoon and early morning. Summer flowering annual.

Mixed Colors—2 feet high...Pkt., 5c; oz., 20c.

Chrysanthemums

Annual varieties. These are showy and effective garden varieties, extensively grown for cut flowers. The foliage is ornamental and finely cut. The single varieties grow 12 to 18 inches high, and produce on long stems large flowers resembling the Daisy, but of many bright colorings in distinct bands or rings.

Finest Mixed—Single .................................. Pkt., 5c
Finest Mixed—Double .................................. Pkt., 10c

Double White ........................................ Pkt., 10c
Double Yellow ....................................... Pkt., 10c

All FLOWER SEEDS sent Postpaid on receipt of price.
GERANIUM

Well-known plants esteemed both for house culture and budding out-of-doors. Sown early in the house, the seedlings will bloom the first Summer. Giant perennial, 1 to 2 feet high. Pkt., 10c.

GYPSOPHILA (Baby’s Breath)

Fine, low-flowered plants covered with star-shaped flowers, valued for mist-like effects such as trimming bouquets, also for hanging baskets and borders. The delicate specimens are hardy, annual, 1 foot high, mixed colors. Pkt., 10c.

HELIOTROPE

Seed sown early in the spring in the house will make fine plants for summer bedding.

GIANT FLOWERED—Choice mixed. Pkt., 10c.

HOLLYHOCK

In situations suitable for tall flowers we know of nothing better than the Hollyhock; and yet the improved varieties do not grow very high—from 4 to 6 feet being about the range. New plants are obtained from seed and by dividing the roots. Seed sown in the summer will give plants that will endure winter. The flowers will be produced during the winter with a little straw and evergreen boughs or paper. Beautiful.

HOLLYHOCK—(Double) Very double and fine. Pkt., 10c.

IMPATIENS

Various hardy seedling and bedding out. Each plant bears a cluster of 2 feet high with large flowers. Some varieties are to crimson. Seed sown in March, Pkt., 10c.

ICE PLANT

Various plants for hanging baskets, rockeries and pot plants. Very handsome, appearing as though watered with ice and sprayed. Tender, annual, 1 foot high.

WHAT IS A HOME WITHOUT FLOWERS?

Do you know of any single place, with a real home atmosphere which has no flowers?

Do you know of a place, no matter how small, which has beautiful flowers around it, that doesn’t look like a real home?

HOW ABOUT YOUR PLACE THIS YEAR?

LOBELIA

CRYSTAL PALACE COMPACTA—Rich deep blue; dark foliage. The finest dark blue for bedding. Pkt., 10c.

MOONFLOWER

Tall-growing free-blooming climbers, related to the family of Morning Glories. As Moonflowers have dense foliage, are useful to cover trellis work, verandas, etc.

NEW HYBRID—Its large white flowers expand in the evening and remain open until the following day. Pkt., 10c; 1 oz., 50c.

MORNING GLORIES

GIANT JAPANESE-Hybrid—Flowers of large size, and of brilliant coloring and markings. The foliage in some plants is plain green, others mottled with white and shades of yellow or yellowish green. Pkt., 5c; oz., 25c.

CONVOLVULUS MAJOR—These are the old-fashioned favorites. Handsome, everyone loves. No climber is more useful. Pkt., 5c; oz., 25c.

MIGNONETTE

SWEET SCENTED—A well-known favorite flowers which may be grown in pots and put outside during the winter. It produces numerous small flower stalks. Grower’s catalog, 41c.
NASTURTIUMS

For ease of culture, duration of bloom, brilliancy of coloring and general excellence nothing excels Nasturtiums. All they need is a moderately good soil in a well-drained sunny position, and from within a few weeks from the time they are sown until hard frost comes, there is endless profusion of blossoms. The varieties offered were selected from a number of sorts as being the best. Sow seed 2 inches deep and thin plants to 8 inches apart for Dwarf varieties and 15 to 20 inches apart for Tall or Climbing varieties.

BEAUTY—Scarlet blotched yellow. Pkt., 10c; oz., 25c.

CLOTH OF GOLD—Scarlet bright foliage. Pkt., 10c; oz., 25c.

CRYSTAL PALACE GEM—Yellow spotted maroon. Pkt., 10c; oz., 25c.

PEARL—Creamy white. Pkt., 10c; oz., 25c.

MIXED DWARF VARIETIES—Pkt., 5c; oz., 15c; lb., 50c.

MIXED TALL OR CLIMBING VARIETIES—Pkt., 5c; oz., 15c; lb., $1.00.

Lee’s Choice Petunia Seed

Few if any plants are more deservedly popular for bedding purposes, green-house or window culture. Their showy flowers, both single and double, are produced from early Summer until late Autumn. They bloom in a few weeks from seed, which, being small, would better be sown indoors and the seedlings transplanted.

LARGE FLOWERED MIXED—Some striped. Pkt., 10c.

SINGLE MIXED—Pkt., 5c.

PHLOX DRUMMONDI

(Large Flowering)

Unequaled in the magnificent display of their many and brilliantly colored flowers. Plants from seed grown in open ground in Fall or early Spring will begin flowering about May 1st and will be literally covered with blooms until Autumn. Unsurpassed for masses of separate colors, or for bouquets. 1 foot high.

CHOICEST MIXED—Best large-flowered varieties. 1 oz., 50c; pkt., 5c.

Poppies

(Annual Varieties)

The flowers are remarkable for their large size, delicacy of tissue and wide range of brilliant dazzling colors. One of the most popular flowers. Very showy. For beds or borders, with a background of green, they are beautiful. Annual Poppies should be sown as early in the Spring as possible, where they are to remain, as they do not stand transplanting. Sow thinly, barely covering.

SHIRLEY—A magnificent variety producing through a long season large single flowers of charming delicate colors, ranging from pure white through shades of pink and rose to brightest scarlet and carmine-red. Hardy annual about 20 inches high. Pkt., 5c; oz., 25c.

DOUBLE POPPIES—(Mixed.) This includes all the double varieties, and will bring flowers showing many varied tints and combinations of colors. Pkt., 5c; oz., 25c.

SINGLE POPPIES—Mixed annual sorts. Pkt., 5c; oz., 25c.

ORNAMENTAL GOURDS

A splendid mixture of Gourds, including all the ornamental kinds, both large and small, or various shapes and colors, such as Japanese, Nest Egg, Mock Orange, Dish Cloth, Turk’s Turban, Dipper, Serpent, Bottle, Warty Gourd, Hercules’ Club and many other curious and unique varieties. Many odd and fantastic shapes. Pkt., 5c.

All FLOWER SEEDS sent Postpaid on receipt of price
PANSIES

The Pansy is everywhere and with everybody a very popular flower. Pansy seed may be sown in the hot-bed or open ground. Seeds sown in a cool place in May or June, and well watered until up, will produce fall-flowering plants. They will flower better in mid-Summer if planted where somewhat shaded from the hot sun, especially if furnished with a good supply of water; but in almost any situation will give fine flowers in the Spring and Autumn.

GIANT TRIMARDEAU PANSIES—(Mixed.) These are the largest flowered of all: a most showy class, of robust and very compact growth. The flowers are carried well above the leaves; splendid for bouquets, as the stems are long. Mixture of finest colors. An unequalled collection of all the finest types. The best, handsomest, and most perfect giant-flowering varieties. Pkt., 10c; oz, 50c; oz., $2.60.

PANSY PLANTS.

At the proper time we can supply Pansy Plants that will come into flowers at once. Price per dozen, 45c; postpaid, 55c.

PORTULACA

Dwarf annual of creeping growth, thriving luxuriantly in an open, exposed situation. During bright, sunny days the plants are ablaze with brilliant flowers of all shades. At night and on dull days the flowers remain closed.

Single Mixed—Large flowers of brilliant colors..............Pkt., 5c; 1 oz, 20c
Double Mixed—Double flowers of all colors...............Pkt., 10c; 1 oz, 75c

Summer Flowering Bulbs, see pages 54-55.

PINKS (Dianthus)

One of the most popular flowers in cultivation, producing a great variety of brilliant colors and profusion of blooms.

Double Flowering Red .........................................Pkt., 5c
Double Flowering White .........................................Pkt., 5c
Double Flowering White Fringed ...............................Pkt., 5c
Double Flowering Pink ..........................................Pkt., 5c

RACINUS (Castor Beans)

Rapid-growing plants with palm-like foliage and showy fruits; 6 to 15 feet. Pkt., 5c; oz., 25c.

STOCKS, TEN WEEKS

This favorite half-hardy summer blooming annual has deliciously fragrant flowers and is very desirable for cutting.

Large Flowering Dwarf White ..................................Pkt., 5c
Large Flowering Dwarf Mixed ..................................Pkt., 5c
Large Flowering Tall White ....................................Pkt., 5c
Large Flowering Tall Mixed ....................................Pkt., 5c

SWEET WILLIAM

A well-known, attractive, free-flowering, hardy perennial, producing a splendid effect in beds and borders with rich and varied flowers.

Single Mixed—All colors...........................................Oz., 25c; pkt., 5c
Double Mixed .........................................................1/4 oz., 25c; pkt., 10c

SUNFLOWER (Helianthus)

An old fashioned flower which are in special favor as a background for lawns and in front of high fences. One of the most deserving of useful hardy annuals. When the plants are 4 inches high, thin one-half to two feet apart, to secure the best development.

DOUBLE CHRYSANTHEMUM FLOWERED—The most attractive of the very double sunflowers. Plant tall, growing seven feet high and blooming profusely all summer. Flowers very large, often eight to ten inches across, very double, with long fringed petals and resemble chrysanthemums. The color is a splendid rich, gold-yellow, true from any black center. Oz., 30c; pkt., 10c.

STEELA—The plant of this fine miniature variety is spreading with many branches and attains a height of about three feet. The flowers are about 2 inches in diameter and are of unusually pure golden yellow with black discs or centers, and are borne on long stems well above the foliage. Early blooming and produced in abundance throughout a long season. Oz., 30c; pkt., 10c.

SALVIA PLANTS can be supplied in season. If interested, write for prices.
Lee’s Selected Sweet Peas

SWEET PEAS, gay and fragrant, are the most universally popular annual flowers cultivated. Inexpensive, easily and quickly grown from seed, thriving in town or country gardens, supplying an abundance of continuous blooms for months. Is it any wonder that they are “everybody’s flowers,” and have been for generations?

ONE OUNCE OF SWEET PEA SEED WILL PLANT 10 FEET

HOW TO GROW SWEET PEAS—The principal essential for the best success is a cool, deep, moist soil, and a sunny situation. The ground should be prepared deep and rich. Fall preparation, where possible, is preferable, but if done in the Spring, use no green manure. Bone meal is good if old rotted manure cannot be obtained. Sow early, as Sweet Peas need the cold, moist spring ground to make the root growth. Sow the seed in deep furrows, the bottom of which must be at least 6 inches below the level of the soil; this is to guard against a Summer drought. Cover the seeds only one inch, after which the furrow is still five inches deep. When the plants are 2 inches high, thin out to 3 or 4 inches apart and fill in another inch or so of soil around the plants, always leaving a portion of the plant above the surface; do this at intervals until the furrow is nearly full; it should always remain a little hollow to hold the rains, and to allow water to be applied in quantity when necessary. During dry weather they should be watered thoroughly and frequently and given an application of liquid manure once a week. A mulch of hay or rakings from the lawn will be found beneficial during the hot weather. The flowers should be picked as often as possible, and all withered blooms should be removed, to prevent the plants from running to seed, which would stop them from continuing in bloom.

EARLY FLOWERING SPENCER AND GRANDIFLORA VARIETIES

When planted out of doors they will commence blooming a month or more earlier than the later varieties planted at the same time.

EARLY SONG BIRD (Spencer)—An excellent pale pink variety which is very desirable for cutting. The flowers are borne on long stems with mostly four large well-waved blossoms to each stem. Pkt., 10c; oz., 35c; 1 lb., $1.25.

Spencer Varieties

THE SPENCER TYPES are of exceptionally large size, the standards and wings waved or frilled and the general effect remarkably graceful and attractive. Spencers are shy seeders, hence the price will doubtless always be considerably higher than the older sorts.

COUNTESS SPENCER—This beautiful pink variety was the first of the Spencer type to be introduced. Flowers of unusual size and substance. The beautifully waved petals and their soft pink color makes it one of the most attractive and admired by all.

FRANCED EDWARD SPENCER—Most beautiful and richest of all the red shades. This large beautiful waved flower stands by itself, a bright crimson.

SENATOR SPENCER—The color is a varying combination of deep claret and chocolate, striped and flaked on a ground of light heliotrope.

WHITE SPENCER—Very large, beautifully waved flowers, pure white.

CAPTAIN OF THE BLUES—Violet blue, large wavy flowers, very handsome.

SPENCER SWEET PEAS, NAMED VARIETIES—Pkt., 10c; oz., 35c; 1 lb., $1.00; lb., $5.50, postpaid.

SPENCER SWEET PEAS, Extra Choice Mixed—Pkt., 5c; oz., 25c; 1 lb., 75c; lb., $2.50, postpaid.

Our Sweet Peas are grown under special contract by the World’s Largest Sweet Pea Grower, receiving the highest possible awards to be obtained at the Panama-Pacific International Exposition, San Francisco, 1915. You can buy nothing better.

Inculcate your Sweet Pea Seed. Garden size, 50c, postpaid.

Grandiflora Varieties

EMILY HENDERSON—A clear white sort. Wings broad and well extended.

AMERICA—The most brilliant of the red-striped sorts.

MISS WILLOTT—Brilliant orange-pink, showing veins of a deeper tint.

BLACK KNIGHT—Deep maroon, shade of black tartarian Cherry.

KING EDWARD VII.—One of the very best pure red shades.

PRIMA DONNA—The most popular clear pink hooded.

COUNTESS OF RADNOR—A beautiful shade of lavender.

Any of the above named varieties, Pkt., 5c; oz., 20c; 1 lb., 60c; lb., $2.00; postpaid, $2.10.

LEE’S ROYAL MIXTURE OF SWEET PEAS—This mixture is made up from carefully prepared formula. Contains over thirty varieties of the best and newest named sorts in which every tint and color is represented. In buying this mixture you get the greatest variety for the least money, of any manner by which you can purchase Sweet Peas. However, if you are partial to colors we would suggest the named varieties. Pkt., 5c; oz., 10c; 1 lb., 35c; lb., $1.90; postpaid, $1.10.

Plant Flowers Around Your Home

All FLOWER SEEDS sent Postpaid on receipt of price.
GIANT FLOWERING ZINNIAS

Sometimes called Youth and Old Age. The well-known bush-like plants of Zinnias produce a profusion of large double imbricated flowers, borne on stiff stems. They are much used for bedding, and are suitable for borders and for cutting.

There is much satisfaction in a bed of Zinnias with their twisted and recurved petaloid flowers in many bright colors, and when nearly every other flower has been killed by frost this plant is still in full bloom. Few flowers are more easily grown or bloom more abundantly throughout the season, and the wide range of color is not less remarkable than their unusual depth and richness.

Sow the seed early in Spring, in open ground, in good, rich soil, preferably in rows one and one-half feet apart and covering about one-fourth inch deep. When the young plants are one to two inches high thin to six inches apart. Start under glass for earlier blooming. Half-hardy annual; tall growing, usually about one and one-half to two feet.

SCARLET, DOUBLE—Large flowering, 1 oz., 25c; pkt., 5c.

WHITE, DOUBLE—Large flowering, 1 oz., 25c; pkt., 5c.

ORANGE, DOUBLE—Large flowering, 1 oz., 25c; pkt., 5c.

CANARY, DOUBLE—Large flowering, 1 oz., 25c; pkt., 5c.

MIXED, DOUBLE—Very brilliant. 1 oz., 25c; pkt., 5c.

WILD CUCUMBER

Annual climber of rapid growth. Pkt., 5c.

WALL FLOWER

Well known, deliciously fragrant; blooming early in the spring, with spikes of beautiful flowers. Pkt., 5c

DECORATIVE PLANTS

Early in the Spring we will issue a price list of Flowering Plants, such as Pansy, Geraniums, Salvia, Petunia, etc., which we will gladly mail on request.

WHAT IS A HOME WITHOUT FLOWERS

Do you know of a single place with a real home atmosphere which has no flowers?

Do you know of a place, no matter how small, which has beautiful flowers around it, that doesn't look like a real home?

HOW ABOUT YOUR PLACE THIS YEAR?

V. C. PLANT FOOD

For Flowers and House Plants

Promotes quick and luxuriant growth and deep green color to foliage and gives rich brilliant colors to flowers.

1-lb. can .................................. 25c; postpaid, 50c
2-lb. can .................................. 45c; postpaid, 55c
5-lb. can .................................. Not postpaid, 75c

Can be used dry or dissolved in water. Full directions on every package. It is odorless.

Norcross Hand Weeder 96c, postpaid.

Please write us during the season as to the results obtained from Lee's Seeds. Each year we find much pleasure in reading such letters from our customers, which encourage us in our efforts to furnish only the best Seed.

Refer to page 5 for Special Flower Seed Collection.
PLANT SUMMER-FLOWERING BULBS

Some of our most attractive and widely grown flowers come from what are known as summer flowering bulbs or roots.

We have made the prices in reach of all, with a view of assisting in making the homes of our customers more attractive and beautiful. Let us commence now to have more flowers around our homes.

LARGE FLOWERING CANNAS

The Canna is the South’s most desirable flower. They produce more color in greater variety for the outlay than any other plant. They rank with Orchids in delicacy and coloring. In revising our selection of Cannas we have eliminated many of the older varieties and added the best of the new and better sorts. So beautiful and grand are these new Cannas, they almost rival the costly Orchids in delicacy, size and shape. One must grow them to fully appreciate the vast improvement in Cannas in recent years. We especially call attention to the five new Cannas listed on this page.

HOW TO GROW CANNAS—When planting dormant roots, do not set too deep. The eye should show a little through the ground when done. Plant in good, rich garden soil mixed with one-half old rotted stable manure. Set them about 18 inches apart each way. Water sparingly the first two weeks after planting; when growing freely, water liberally.

Prices given on this page include prepaying of charges.

FIVE SUPERB NEW CANNAS

THE PRESIDENT—Height, 4 feet. In color a rich glowing scarlet. The President is superior to any other red variety in quantity and also quality of bloom. The immense flowers are 7 inches across when open. Are produced on strong erect stalks, well above the large, rich green foliage. Resists heat and drought to a remarkable degree. One of the most marvelous Cannas ever produced. 35c each, $3.60 per dozen, postpaid.

MRS. A. F. CONRAD—Height 4 feet. The most popular Pink Canna and considered by many the most beautiful of all Cannas. The exquisite Salmon Pink flowers are of the largest size. The shade of pink is most attractive and heretofore has been unknown in Cannas. 30c each, $3.00 per dozen, postpaid.

FIERY CROSS—(Burpee’s New One.) Height 5 feet. Color vivid scarlet, shading to crimson. One of the best of the newer sorts. 35c each, $2.25 per dozen, postpaid.

FIREFIELD—Height 4 feet. One of the most beautiful of the newer sorts. Color intense glistening scarlet, flowers enormous, borne on very large and compact trusses. 25c each, 2.75 per dozen, postpaid.

RING HUMBERT—Height 4 feet. The best bronze-leaved Canna. Gives immense masses of crimson blooms. Popular and satisfactory. 15c each, $1.60 per dozen, postpaid.

Caladium Esculentum (Elephant Ears)

A vigorous growing plant which has tremendously large pendulous leaves borne on long stiff stems. In rich soil, with an abundance of moisture, assume very large growth and is most effective singly on lawns or planted in centers of beds or as backgrounds in groups and quite often as a border around Cannas, or other blooming plants.

Summer-Flowering Bulbs and Tuberous Roots

Prices given do not include prepaying of charges, except where noted.

FIELD GROWN DAHLIA ROOTS

The flowers are so symmetrical, the range of color so varied, and they are so easily grown that Dahlias will always be popular where an Autumn display is desired. After danger of frost is over plant three feet apart, pinching out the tip when three sets of leaves appear, to make them more bushy and avoid staking.

CACTUS DAHLIAS
OF SPECIAL MERIT

CHARLES CLAYTON—The strongest words of praise are not extravagant when applied to this wonderful cactus. Stems are long, holding the flowers well above the foliage. The color is a most intense red, so vivid as to dazzle the eye. Flowers are large in size and are produced freely. Each, 30c; postpaid, 35c.

COUNTRESS OF LONSDALE—The finest-flowering Cactus Dahlia in the collection, and perfect in form. Color, an exquisite shade of rich salmon, with just suspicion of apricot at the base of the petals. Each, 30c; postpaid, 35c.

KREIMHILDE—Shell pink, shading to white in the center. A very popular cutting variety. Each, 30c; postpaid, 35c.

MARION THOMPSON—A new pure lemon yellow. Flowers extra large and an exceptionally good keeper as a cut-flower. Stems long and stiff. One of the best of all pure yellows, Early and free. Each, 30c; postpaid, 35c.

PERLE DE LYON—A large cactus. Petals cleft at the tip. Pure white flower and borne on good stems. Each, 30c; postpaid, 35c.

VELVET QUEEN—Dark rich red of perfect form. Stems long and wiry. A profuse and constant bloomer, A fine variety. Each, 30c; postpaid, 35c.

PEONIES

The Peony of all the hardy outdoor plants is perhaps the oldest and best-known inhabitant of the flower garden and in the improved double forms offered by us the gorgeous display of blooms in the months of May and June is unequalled, the flowers being perfectly double, many being very fragrant and all of massive size.

They are perfectly hardy, requiring no protection whatever, even in the most severe climate, and once planted increase in beauty each year.

An important point to observe in the planting of Peonies is not to plant too deep. The roots should be placed so that the crowns are covered with two inches of soil. Too deep planting and poor soil is a frequent cause of shy flowering.

DUCHESS D'ORLEANS—Large carmine pink guards, center soft pink interspersed with salmon; large fragrant; midseason. 50c, postpaid.

ZOE CALOT—Very large, very full, globular bloom; soft pink tinted lilac; growth strong, upright; stiff stems; late midseason. 50c, postpaid.

FESTIVA MAXIMA—Of enormous size and wondrous beauty; pure paper white flaked purplish carmine on some central petals; early; very fragrant; very long, heavy stems; fine. 60c, postpaid.

DUCHESS DE NEMOURS—One of the best regardless of price; superb ivory white becoming pure white; fragrant; early to midseason. 60c, postpaid.

MYER'S SPRAY PUMPS

WE CARRY THE LARGEST STOCK OF SPRAY PUMPS IN FORT SMITH

Description catalogue of these goods mailed on application

All prices on this page are based on customers paying freight and express charges.

NO. 322—MYER'S BRASS SPRAY PUMP—(See cut.) A convenient and inexpensive pump for use where a larger pump is not required. Each $6.00.

NO. R 321—MYER'S COG GEAR BUCKET SPRAY PUMP—(See cut.) With agitator, (See cut.) With agitator, 14 made of brass with ball valves, complete with hose and graduating Vermorel fine coffee spray and solid stream nozzle. Especially adapted for light orchard work and for whitewashing. Each $9.50.

NO. 318—MYER'S COG GEAR BARREL SPRAY PUMP—(See cut.) Complete with one head of 15 feet of 1-inch 5-ply discharge hose, graduating Vermorel nozzle. Price $25.50.

NO. 361—MYER'S O. K. COG GEAR SPRAY PUMP—(See cut.) To be used on closed and barrel complete with one head of 12 feet of 7-ply discharge hose and Pembro (Fig. 1290) Nozzle. The cylinder and valve are solid brass. The handle has a cog gear so as to enable the operator to carry a pressure of 200 lbs. or more if necessary. The cog gear increases the leverage 50 per cent over the ordinary plain handle. This pump is capable of doing heavy work. Price $35.00.

NO. R 308C—Same as above, with two heads of 15 feet 1-inch hose and two Pembro (Fig. 1290) nozzles. Price $42.00.

NO. R 314R—(See cut.) Pump complete with 15-gallon barrel and mechanical agitator, mounted on skids, with pressure gauge, one 15-foot head of 1-inch 7-ply discharge hose, one Pembro (Fig. 1290) nozzle, one 8-foot cork. $12.50 pipe extension with lever shut-off. Price, each, $6.00.

NO. R 356C—Same as R 316-B, but with two heads of hose. Price $7.00.

NO. 336—MYER'S KNAPSACK SPRAY PUMP—(See cut.) This Pump is their popular brass spray pump. Has brass ball valves, solid plugger and agitator. Fitted with 15-foot head of 1-inch hose, Cork extension, Bordeaux or graduating Vermorel spray nozzle, which can be graduated from a fine mist spray to a solid stream, on shut off end. Pump holds 5 gallons. Price $15.00.

NO. 1106—HUDSON PERFECTION COMPRESSED AIR SPRAYER. For potato spraying, whitewashing, disinfectants, etc. A high pressure sprayer. The all-riveted seams give the necessary strength.

Pump—11 inches in diameter. 15 feet long seamless brass tubing. The valve is "brass." Has a capacity of 7 gallons. Made of first quality galvanized sheet iron. Shipping weight 60 pounds. $8.00 f. o. b. Fort Smith.

FOR PRICES ON INSECTICIDES, REFER TO PAGE 60.

REFER TO PAGE 57 FOR DESCRIPTION OF MYER'S SPRAY NOZZLES, EXTENSION PIPES, ETC.
MYER’S SPRAY NOZZLES, EXTENSION PIPES, CULTIVATORS, ETC.

PRICES DO NOT INCLUDE POSTAGE, EXCEPTING WHERE NOTED.

A SPECIAL METAL SPRAYER designed especially for use in gardens, houses, stables and field. Handles Oils, Polishes, Paints, Pesticides in any quantity. One quart made of tin. Each, 60c; postpaid, 70c.

GLASS TANK SPRAYER
Filled with two Brass Spray Tubs, quart Mason fruit jars. This is not only a splendid Spray Pump, but liquid container being glass, there can be no rusting out of the tank. Each, 70c; postpaid, $1.00.

131 DRY POWDER GUN
EASY—A Glass Tank—An absolutely perfect apparatus for those desiring a Spray Sprayer. One of the most popular types for the home garden and flower garden. The Glass Tank is larger than the hand sprayer, tank made of galvanized iron, capacity one gallon. Each, $2.75; postpaid, $3.00.

NORCROSS HAND CULTIVATOR
The best hand cultivator. In the three sizes they are suited to both men and women for garden and flowers. Handles 4 feet long, 3-prong, $1.10 each; 5-prong, $1.25 each, not postpaid.

MIDGET—5-inch handle. Each, 60c, postpaid.

WIRE HANGING BASKETS
Made of No. 14 smooth wire, galvanized before weaving.

No. 5—9-1/2-inch, 121/2 in deep, 15c; postpaid, 20c.

No. 6—11-inch, 6 in deep. Each, 50c; postpaid, 60c.

No. 7—14-inch, 7 in deep. Each, 50c; postpaid, 75c.
Reliable Incubators and Brooders

Standard Incubators have an INTERNATIONAL REPUTATION and have been sold on the market for thirty-eight years. We do not hesitate to recommend them as being one of the best incubators offered to the trade. Prices named on Incubators and Brooders on this page are F.O.B. Fort Smith. Write for complete catalogue.

The Standard Reliable Incubator

The walls of these machines are double; the space between them carefully insulated with the best non-conductors of heat known.

A DOUBLE HEATING SYSTEM

A unique feature of the Reliable is its double heating system—a feature possessed by no other Incubator, and one which gives a decided advantage in economy of operation.

This tank, in addition to heating the fresh air supply, before conducting into the egg chamber, also radiates heat from its own surface, in sufficient quantity, that, if necessary, the heat from the hot water tank could be cut off entirely and the hot air tank would maintain the temperature at the proper degree.

No. 50-A—Capacity 100 Eggs, hot water...........................................$29.70
No. 52—Capacity 140 Eggs, hot water...........................................$29.00
No. 54—Capacity 240 Eggs, hot water...........................................$44.00
No. 56—Capacity 350 Eggs, hot water...........................................$66.00

Baby Grand Incubator

50 Egg Capacity, All Metal

Unique and superior in its construction. Excellent in its hatching qualities, and most reliable and easiest operated small incubator ever offered to the trade. It has a glass window on top so thermometer can be seen without opening, and the chickens can be seen hatching without opening machine.

Just the thing for the small fancier; is simple in construction, easy to operate, self regulating. Can be shipped by express or parcel post. The demand for these BABY GRAND INCUBATORS exceeded our supply last season. They have proven satisfactory in every respect, where a larger incubator is not required.

50 Egg Capacity (Shipping weight 16 lbs.).................................$9.00

The “Babie” Chick Feeder

Will accommodate 30 to 40 chicks. Feed is dropped through top, chicks cannot be bothered or trampled by old-r-fowl. Made of galvanized materials, rust proof. Has patent door arrangement which permits the little chicks to enter but prevents the older ones. $2.00; postpaid, $2.15.

These Hovers have the same chick capacity as the coal burning brooders, are more satisfactory in every respect, and the only brooder on the market which we could recommend. A few of the special points on this oil heated Hover are as follows: Burns coal oil, Steady Blue flames, Comfortable and Easy to operate, Economy of operation. No wick to trim. Abundance of heat. No oil fumes. Visible oil feed. Convenient and safe. No coal, Smoke or gas. The flow of oil is regulated automatically.

Size Hover Capacity Each
No. 00—18-inch Oil Reservoir, Galvanized Steel, 100 Chicks, shipping weight, 14 lbs..........................$10.00
No. 0—30-inch Oil Reservoir, made of Glass, 250 Chicks, shipping weight, 40 lbs...................18.15
No. 1—42-inch Oil Reservoir, made of Glass, 500 Chicks, shipping weight, 45 lbs.................20.35
“BUCKEYE” INCUBATORS

WRITE FOR COMPLETE BUCKEYE CATALOG. Prices Named on Incubators are f. o. b. Fort Smith.

We have sold the Buckeye Incubators for many years, and they have given uniform satisfaction. You take no chance in buying a “Buckeye.”

One of the main features is the Hot Water System by which it is heated. The arrangement of this heating system is such that the hot water is constantly circulating through the tank, thereby maintaining an absolutely uniform temperature at every point in the egg tray. They are easily operated. Can be operated with oil or gas.

CAHOON BROADCAST HAND SEED SOWER

Sows from four to eight acres per hour at an ordinary walking gait, throwing wheat about 40 feet wide. A saving of four-fifths of the labor and one-third of the seed is effected by the use of this machine, and a person entirely unused to sowing by hand can use it with perfect success. Full directions for use with every machine. Shipping weight 7 lbs. Price, $5.50.

THE CYCLONE SEEDER

For a medium priced machine, the Cyclone Seeder, we believe, is the best on the market. The machine is so simple in construction and perfect in operation that even a boy can operate it. The shipping weight is 4 lbs. Each, $3.90; postpaid, $3.10.

PULTRY FEED and REMEDIES

Pages 61 and 62

INSECTICIDES AND FUNGICIDES

Poison or any preparation of poisonous nature cannot be sent by mail. This includes all Insecticides on this page excepting Slug-Shot, Grape Dust, Rat Corn, Fish Oil Soap, Bug Death

LIME-SULPHUR—DRY POWDERED—A Scale and Fungus Destroyer. For Fall, Winter and early Spring. Destroys San Jose Scale, Peach Leaf Cur, Bud Mites and other Fungus and also Scale Insect or bark lice. Dissolves immediately in cold water, making a solution that adheres to foliage for the longest possible time. 12 to 15 pounds dry lime sulphur will produce 50 gallons spraying material for dormant work. Lb., 5c; 5 lbs., $1.16; 10 lbs., $2.50; 25 lbs., $5.00.

ARSENATE OF LEAD, DRY POWDERED—Kills leaf-eating insects, such as grasshoppers, scale, flies, etc., and destroys their eggs. Can be used with a powder-gun or mixed with water and used as a liquid spray. 5 lbs., 25c; 1 lb., 20c; 1 lb., 5c. 

BORDEAUX MIXTURE—The best and most generally used spray for blight, mildew, curved leaf, pear scab, etc. All prepared and ready for use. Use 4 to 6 lbs. to 50 gallons of water. Not available Dry or powdered. 1 lb., 50c; 5 lbs., $2.00; 25 lbs., $7.25; by express only.

KEROSENE EMULSION—Combines the value of Kerosene Oil and Resinous Soap, stinking and destroying insect pests. If thrown over tent of hairy caterpillars in a fine stream and with some force, it breaks the web and destroys the caterpillars. A normal dilution is one gallon to 20 or 40 gallons of water. Per quart, 75c; by express.

CALCIUM ARSENATE FOR BOLL WEEVIL—Will kill boll weevils by the "dusting" method. This is the only method of killing boll weevils known. It has been thoroughly tested by and recommended and endorsed by the United States Government. We have the highest grade Calcium Arsenate made and guaranteed as to Government requirements for boll weevils. We have special booklets treating on the cotton boll weevil and how to apply Calcium Arsenate, free on request. Calcium Arsenate is also a standard poison for controlling apple, pear, cherry, grapes, potatoes, garden plants, etc. Sold only in sealed packages. ½ lb., 30c; 1 lb., 55c; 5 lbs., $2.50; 25 lbs., $9.75, by express only. Write for quantity prices.

FISH OIL SOAP is excellent as a wash for keeping the trunks of trees free from insects. It penetrates in the creases and destroys the eggs, also acts against any other variety of animal matter both on out door and in-door plants. Dissolve ½ lb. in boiling water to 2 gallons water. Cakes about 1 lb. each, 50c; postpaid, 60c.

RAT CORN—Sure death to rats and mice. Not poisonous to other animals. In cans, 25c, 50c and $1.00, postpaid.

Prices Subject to Market Fluctuations

SLUG-SHOT—A non-poisonous powder and very popular insecticide. It requires no further mixing or preparation; easily applied and not injurious or dangerous to animals, the person applying it, or fruits, or vegetables treated. Destroys potato bugs, beetles, green and black flies, slugs, caterpillars, etc. Very effective for cabbage lice and worms. Price, 1-lb. carton, 20c; 5 lbs., 60c, postage extra.

GRAPE DUST—A preparation to kill the destructive Mildew that strikes Grapevines, Roses, Gooseberries, etc. It is a compound which appears to be quicker and more effective in its action than sulphur. 1-lb. carton, 25c; 5-lb. pkg., 50c, postage extra.

BUG DEATH—Sure death to chewing insects on Potato, Tomato, Squash, Cucumbers, Melons, Cabbage, Celery, Strawberries, Carrots, at the same time does not injure the plant or its regular growth. Contains no Paris Green or Arsenic. Can be used without harm to plants, trees, birds, stock or humans. Bug Death is so useful a supply should be kept on hand all the time. Lb., 20c; 3 lbs., 55c; 5 lbs., 75c, postage extra.

PARIS GREEN—Kills bugs which chew the leaves. Usually 1 pound to 50 gallons of water will be satisfactory. (Not available.) ½ lb., 25c; 1 lb., 45c; 1 lb., 50c; 2 lbs., $1.50; 5 lbs., $2.50, by express only. Write for prices in larger quantities.

"BLACK LEAF 40"—It destroys Aphids (plant lice), Thrips, Leaf-hoppers on all tree, bush and vine fruits, vegetables, field crops, flowers and shrubs; also Apple Red Bug, Pear Psylla and similar soft-bodied sucking insects, without injury to foliage. May be combined with other sprays. Highly concentrated. Soluble in water—easy to mix—does not clog nozzles. 1 oz., 25c, makes 6 gallons spray; ½ lb., $1.60, makes 49 to 126 gallons spray; 2 lbs., $2.25, makes 160 to 500 gallons spray; 10 lbs., $13.75, makes 900 to 2500 gallons spray.

Poison or any preparation of poisonous nature cannot be sent by mail. This includes all Insecticides on this page excepting Slug-Shot, Grape Dust, Rat Corn, Fish Oil Soap, Bug Death

NOTICE TO GARDENERS—In order to help the smaller consumer, we have worked out the following schedule, which will give in tablespoon measure the proper quantity of insecticide to use to each gallon of water.

Dry Arsenate of Lead—Seed Fruits and Truck Crops: 3 to 4 level tablespoons to one gallon water. Stone fruits, 2 to 3 tablespoons to one gallon water.

Dry Green—2 level teaspoons to one gallon water.

PHENOLA

A COMBINED DISINFECTANT AND PAINT OR WHITENASH—Kills lice, mites, by eggs, etc., and is a preventive of contagious diseases that affect poultry and live stock. Dry white, so that it makes poultry houses, stables, cellars, etc., cheerful, bright and better looking; at the same time it is disinfecting. Ready to use just as soon as it is mixed with cold or hot water. Does not spoil by standing so it can be kept on hand ready for instant use when wanted. Does not bother, make or per off as Whitewash does, and it has no disagreeable odor to taint milk or other food products.

One pound mixed with one gallon of water has a germicidal strength about three times stronger than a five percent solution of pure Carbolic Acid, which is the standard for general disinfecting purposes, but neither poisonous nor caustic.

One gallon will cover approximately 250 square feet of surface.

Supplied in three sizes—1 pound (1 gal.), 25c; 10 lbs, (10 gals.), $2.00, postage or express extra.
POULTRY SUPPLIES

Prices do not include prepaying of charges, except where noted.

LEE'S POULTRY FEEDS

LEE'S HEN FEED—(Sold in 100-lb. bags.) A perfect combination to make hens lay. It is a complete food, containing varieties of seed and grains. Market Price.

LEE'S CHICK FEED—This mixture is manufactured to supply the demand for an all-grain Chick Feed. Market Price.

CONNEY'S BUTTERMILK STARTING FOOD—Provides buttermilk for the Chicks in a dry, sanitary form. It makes a regular, uniform supply possible, and in addition to this it contains sweet, pure grains, and just enough medication to start the organs working in a normal way. It is a nourishing, stamina-building food that makes the youngsters husky and strong. Market Price.

MEAT SCRAPs—Rich in material which makes bone, muscle and lean meat. They insure health, thrift and vigor, and satisfy the natural craving of the bird's system for flesh food in some form. Contains 55 per cent protein. 25 lb. bags, $5.90; 50 lb. bags, $5.75; 100 lb., $17.25.

CHARCOAL—Nothing takes the place of Charcoal, as it purifies the blood, aids digestion, and tones up the whole system. 2 lbs., 25c; 5 lbs., 50c; 25 lbs., $2.90.

CRUSHED OYSTER SHELLS—The most frequent cause of hens not laying is the absence in the food of carbonate of lime. As crushed Oyster Shell is practically pure carbonate of lime, it supplies, when fed to poultry, the most essential element, and greatly aids in the formation of the egg. 10 lbs., 25c; 100 lbs., $1.75.

POULTRY GRIT—Two grades, coarse and fine. 10 lbs., 25c; 100 lbs., $1.75.

NEST EGGS—Porcelain, Per doz., 40c; postpaid, 50c.

IMPROVED CHAMPION LEG BANDS—They are adjustable to fit any fowl, and, being held by a double lock, it is impossible for them to come off. Per doz., 15c; 100, 50c, postpaid.

PHENOLA—A combined Disinfectant and Paint or Whitewash. Refer to page 66 for description and prices.

NOTICE
All articles quoted on this page, with the exception of Lice Liquids, Lice Powders and Ointments, add for WAR TAX at the rate of 1c for every 25c or portion thereof.

Dr. Hess Poultry Pan-a-cc-e-a

makes poultry healthy; makes hens lay; not a stimulant, but a tonic, that tones up the dormant egg organs, brings back the scratch and cackle, and compels each hen to put her share of eggs in the market basket.

It also contains internal antiseptics that counteract disease; insures a healthy, singing poultry flock. Cost but a trifle—a penny's worth enough for 25 hens per day. 1½ lbs., 50c; 5 lbs., 75c. Postage and war tax extra.

INSTANT LOUSE KILLER

Kills lice on poultry, horses, cattle; sheep ticks; bugs on cucumber, squash and melon vines; cabbage worms; slugs on rose bushes, etc. Sold in sifting-top cans. 1 lb., 30c; postpaid, 35c.

DR. HESS ROUP REMEDY

For Roup, Diphtheria, Chicken Pox and all catarrhal diseases. It has these distinctive features: it is antiseptic, slightly astringent, non-irritating and healing. 4-oz. cans, 25c; 10-oz. cans, 50c; postpaid, 50c and 65c. War tax extra.

DR. HESS STOCK TONIC

(Formula printed on every package)

Every ingredient endorsed by the U. S. Dispensatory and other high medical authorities. It aids digestion, makes stock healthy, and expels worms. Helps stock convert more ration into milk, flesh, blood and muscle. Every pound backed by the Dr. Hess & Clark unqualified guarantee. 2 lbs., 37c, postpaid; 4½ lbs., 70c postpaid; 25-lb. pails, $2.50. War tax extra.

DON SUNG

A very extensively advertised Egg Laying Tonic. Two sizes, 50c and $1.00; 32c and $1.04, postpaid, including war tax.
WOOD LAWN RAKE

The handle, head and teeth are all made of well-seasoned hard wood, and oil finished. Teeth are fastened in by a special process so they will not fall out. It makes a light, efficient and most desirable rake for the lawn. 23 inches wide, and has 36 teeth. Each, $1.40, by express.

GOOD GARDENS SAVE MONEY

Let Us Figure on Your Wants

It is our greatest endeavor to make our house a house of service. To make the buying of LEE’S SEEDS as convenient as it is possible, we have LEE’S SPECIAL QUOTATION SHEET on the opposite page, which we trust you will find occasion to use. Frequently we can make lower prices on large orders of some seeds. On a great many seeds, and especially field seeds, the prices from time to time change and firm prices cannot be given in our catalogue. Market gardeners, as well as the person wishing to purchase field seeds, will find this page convenient. All you have to do is to write down the name and quantity of kinds you want, tear it out and mail it to us. We will quote you the best price we can make you, estimate the weight, figure out the freight or express charges and send it back to you promptly. This information does not obligate you to buy from us.

Plant Lee’s Seeds for Best Results

This sheet is not to be used for family garden orders, such as seeds in packets, ounces, pounds or special collections. Prices on these are distinctly stated in our catalogue, together with special discounts which will be noticed on inside of front cover. With these offers standing open to every seed buyer we cannot and will not make special quotations on family garden seed orders.

THE SPACE BELOW IS FOR REMARKS
Lee's Special Quotation Sheet

This is Not an Order Blank

ARThUR G. LEE, Fort Smith, Ark,

Dear Sir:

Please name me your lowest prices on the list of seed given below, at the same time advising me about what the Express or Freight charges would be delivered to my address. It is distinctly understood that in asking for this special quotation I am under no obligation to purchase same, and that this is entirely for my own information as to prices and Express and Freight rates.

What the Experiment Stations Say

"The peculiar values of legumes for maintaining and increasing the fertility of soils is due to certain bacteria which develop nodules upon the roots of leguminous plants and which have the unique power of rendering the free nitrogen of the atmosphere available for plant growth. Without these bacteria, legumes, like other crops, exhaust the soil of its combined nitrogen."

"All legumes grown either for the purpose of enriching the soil or for the crop must, in order to be of the greatest benefit to the land and the plants, be provided with the nitrogen-fixing bacteria. It is believed that the artificial culture is the method most efficient, cheapest, and freest from objectionable qualities."—Ext. Bulletin No. 71, Bureau of Plant Industry.

"It has been amply demonstrated, not only by hundreds of years of actual experience, but by numberless carefully conducted experiments in many countries and under widely varying conditions, that clover and numerous other legumes supplies with tubercle (nodule) bacteria obtain from the air through the agency of these bacteria, under favorable conditions, all the nitrogen they require, and that they leave in the soil considerable quantities for succeeding crops. In Germany the amount of nitrogen added to the soil by legumes, besides that taken off in the crop, is estimated at 200 pounds per acre. In the United States the average for sixteen states is 122 pounds equivalent to not less than 800 to 1,000 pounds of Nitrate of soda per acre."—Ext. Yearbook of Dept. of Agriculture for 1906.

Mulford Cultures

Mulford's Cultures are prepared in the laboratories of the H. K. Mulford Co. with the same scientific skill and precision as is exercised in the preparation of Mulford's antitoxins, serums, vaccines and their other medicinal products. They have a world-wide reputation—your physician can testify to the responsibility of anything put up by the H. K. Mulford Co.

SPECIAL BOOKLET FREE TELLING YOU ALL ABOUT THE INOCULATION.

If you want to know more about the inoculation of seed of leguminous plants send for free booklet telling all about it. Ask for The Mulford Booklet, which takes the subject up in detail and shows you exactly why you can't afford not to inoculate your legume seeds.

PRICE—One-acre size bottle, $1.50; 5-acre size bottle, 5.00; Garden or 1-acre size bottle, 75c; small size, 5c, postpaid. Specify the crop you want to use it on.
